

VAXING for a cleaner home...

Congratulations on purchasing your new Vax Complete Care machine. This is a COMPLETELY NEW CONCEPT in cleaning machines. You can use it for all your daily vacuuming needs, you can use it to suck up floods, emptying water from your chest freezer when you defrost it, or even unblocking sinks and drains. But most important of all you can use it to VAX (wash clean) your carpets and upholstery.

Because you will probably be VAXING carpets that have been laid in your house for some time, they will have a considerable amount of dirt and grit trapped in the pile although this may not be apparent visually, they will take longer to clean the first time. It is important to get them clean and remove all this grit. You will then find that you get far less fluff in the dust bag and much less dust around the house. Once you have got your carpets clean, it is important to 'keep them clean'. VAXING will be almost as quick and easy as normal vacuuming. As a general rule you should VAX your carpets once a month and you will find that they will stay fresh and clean and you get far less dust in your house. This is a particular benefit if the machine is being used in shops, offices, pubs, hotels and hospitals. In very heavy use areas, the VAXING frequency should be increased.

The Wool Secretariat now advise regular cleaning of carpets. The unique VAX patented cleaning action with the 'inbuilt safety system' allows you to do this without any harm to your carpets and because it removes the embedded grit and dirt, keeps your carpets looking better for longer.

Remember - VAX is not an ordinary vacuum cleaner. To ensure that you get the best results and do not infringe your warranty, please read these instructions carefully.

How it works

The machine gently pushes a stream of warm water and cleaning chemical into the carpet fibres which frees the ground-in dirt. Unlike other machines which use a pressure jet of cleaning solution, the VAX patented cleaning action causes a turbulence in the carpet fibres which ensures that the carpet fibres are clean all around, not just on one side. As the dirt and cleaning solution are extracted simultaneously your carpets will soon be dry.

Why should I use a Vax?

Vacuum cleaners have not really changed for the last 50 years. Carpets have! We used to take the carpets outside and beat them once a year to remove the dirt and grit the vacuum cleaner left behind. Now they are fitted and this ingrained dirt stays in the carpets. Most carpet cleaners leave a residue of foam and dirt in the carpet causing rapid resoiling. The Vax machine completely overcomes this problem as almost no residue is left behind in the carpet fibres. The powerful suction removes the silt into the dirt recovery bucket which is then emptied down a drain. You will see the actual dirt particles that wear your carpet out as you pour the dirty water away. The 'inbuilt safety system' ensures that your carpets are dry as quickly as possible and that you can walk on them as soon as you have finished cleaning.

Can I clean all sorts of carpets and upholstery?

Yes you can—with due provision. Always test colour fastness of the item to be cleaned before you start (see instructions). Only experienced cleaners should attempt to clean natural velvet covered upholstery as this may water-mark. The Company accept no liability in respect of any damage to your carpets or upholstery resulting from the use of the VAX as the total control over the use of the machine is in the hands of the operator.

What cleaning chemicals should I use?

The VAX machine is unique in the world. No other machine washes carpets the same way and therefore you can only use the special chemicals that have been formulated for use in the machine—namely VAX CARPET CLEANER and VAX DEFOAMER. VAX carpet cleaner has been tested by WIRA and is safe for use on all fabrics including dralon, but not velvet which you should have cleaned professionally.

No other chemical cleaner is recommended for use with your VAX machine.
