Solutions Manual for Selected Problems Harry L. Van Trees, H. David Goldfein, 1968 *Detection Estimation and Modulation Theory, Part I* Harry L. Van Trees, Kristine L. Bell, 2013-04-15 Originally published in 1968 Harry Van Trees's *Detection Estimation and Modulation Theory Part I* is one of the great time tested classics in the field of signal processing. Highly readable and practically organized it is as imperative today for professionals, researchers and students in optimum signal processing as it was over thirty years ago. With a wide range of applications such as radar, sonar, communications, seismology, biomedical engineering and radar astronomy among others the important field of detection and estimation has rarely been given such expert treatment as it is here. Each chapter includes section summaries, realistic examples and a large number of challenging problems that provide excellent study material. This volume which is Part I of a set of four volumes is the most important and widely used textbook and professional reference in the field. **Detection, Estimation and Modulation Theory :**
