Educational Leadership, Culture, and Success in High-Need Schools

Elizabeth T. Murakami, David Gurr, Ross Notman, 2019-05-01 The exploration of the intersection of leadership practices from the school principal and other educators the school culture and the school success across different high need contexts and cultures make this volume unique Chapters in this volume present original investigations or reanalysis of empirical research enhancing our understanding of the interrelationship between leadership culture and success through descriptions of practice that can contribute to lessons in leadership for school improvement When considering a culture of success leadership that focuses on impacting schools in high need areas bring about lessons on how to create sustainable environments for student learning in challenging contexts High need schools include not only socioeconomic challenges influencing the performance of students It includes multiple external and internal factors impacting leaders teachers students and their families affecting the management of structures processes and most importantly learning In the quest to improve high need schools and understand strategies for principals dedicated to a

variety of contexts this volume brings lessons with application for researchers policy makers and practitioners who want to join in the quest to improve the quality of education among worldwide communities *Motor Coordination* Arnold L. Towe, Erich S. Luschei, 2013-11-21 The focus of this volume differs from what is suggested by the series title for it is on muscle contraction and movement rather than on behavior The lone overnight flight of a ruby throated hummingbird across the Gulf of Mexico is a migratory behavior mediated through an incredibly lengthy repetitive series of wing movements each movement being produced by a complex sequence of muscle contractions It is significant that these same movements may be used to mediate other behaviors and that these same muscle contractions in different sequence may be used to produce other movements The immense journey of white bearded gnus across the Serengeti plains to suitable calving grounds is likewise a migratory behavior mediated through rather more varied yet repetitive limb movements each produced by a complex sequence of muscle contractions Again these same movements may be used to mediate other behaviors and again the details of each limb movement may be varied through variations in the strength and the sequence of muscle contractions A laboratory rat may learn to perform an escape behavior in a shuttle box bringing its performance to a high level of efficiency by modifying its movement on successive trials After intraperitoneal injection of pentobarbital sodium in an amount sufficient to render the animal severely incoordinated the escape behavior is still performed albeit through a different sequence of movements even to rolling out of the compartment in response to the warning signal **Transforming Business Education through Artificial Intelligence** Sonu Dua, Sakshi Dua, Pawanpreet Kaur, 2025-11-18 This new book delves into the multifaceted intersection of AI and business education offering insights strategies and perspectives on leveraging AI to enhance learning decision making and organizational efficiency From the incorporation of AI into curriculum development to its application in decision making processes content recommendation and continuous learning initiatives this volume illuminates the transformative potential of AI across various educational dimensions It also discusses the practical implications of AI in areas such as customer relationship management entrepreneurship finance international business and retail management providing actionable insights for business students leaders and educators alike Through discussions on predictive analysis knowledge management content development and the digital transformation of educational models this book offers a holistic perspective on the role of AI in shaping the future of business education *Fundamentals of Multicomponent High-Entropy Materials* Brian Cantor, 2024-11-13 Human development has been a continuing attempt to use new materials in ever more sophisticated ways to enhance the quality of human life Throughout history we have made materials with a main component based on the principal property required with small alloying additions to provide secondary properties But recently there has been a revolution as we have discovered how to make much more complex mixtures providing completely new materials requiring entirely new scientific theories and massively extending our ability to make useful products These new materials are called multicomponent or high entropy materials This is the first textbook on the

fundamentals of these new multicomponent high entropy materials. It includes contextual chapters on the history and future potential for developing humankind as driven by the discovery of new materials and core chapters on methods for discovering and manufacturing multicomponent high entropy materials, their underlying thermodynamic and atomic and electronic structures, their physical, mechanical and chemical properties, and their potential applications. This book concentrates on the main new concepts and theories that have been developed. It is written by the scientist who first discovered multicomponent high entropy materials and covers how to make them as well as their structures, properties and potential applications, providing an overview and a summary of the state of play for researchers as well as for students and newcomers entering the field.
