Educational Psychology Anita E. Woolfolk, 1994-12-01 **Educational Psychology Australian Edition** Anita Woolfolk, Kay Margetts, 2012-07-25 Learning and teaching is an integrated process and theory and practice cannot be separated. As in the previous Australasian edition *Educational Psychology* 3e continues to emphasise the educational implications and applications of child development, cognitive science, learning and teaching. Recurring themes throughout the text include ideas about education, social and socio-cultural aspects of education, schools, families and community, development, learning and curriculum, and effective teaching. Author Kay Margetts incorporates Australasian perspectives and applications using the work of Australasian researchers and teachers. Numerous examples, case studies, guidelines, and practical tips from experienced teachers are used in the text to explore the connections between knowledge, understanding and practice. *Educational Psychology: Constructing Learning* Dennis M McInerney, 2013-08-15 *Educational Psychology: Constructing Learning* 6e sets the standard for educational psychology texts in Australia and New Zealand with its comprehensive, authoritative and research-based coverage of the subject. This edition includes completely updated content to reflect recent advances in the discipline, including revised theory into practice features from 39 international developmental psychologists. The author has retained the constructivist approach that made previous editions so engaging and relevant to student teachers, and content has been constructed around the new Australian Profession Standards for Teachers.
