

# AUDITION

## OPERATING GUIDE

### GENERAL DESCRIPTION

The new Audition™ is the smallest Peavey amp presently available, but offers performance and features that utilize the latest in technology and electronic components. In the design of the Audition™, we included a full complement of operating controls to enable this new practice amp to create widely variable harmonic features as well as variety of equalization found in much larger and more powerful units. The Audition™ presents total flexibility at the price level of most manufacturers' "toy amps."

Our special input preamp utilizes new and unique circuitry to yield tremendous gain, dynamic range and functional versatility. The Audition™ features an input jack which provides the standard high gain input in addition to Pre (input level) and Post (master volume) gain controls. The Post Gain control is equipped with our new Full Saturation™ effect which enables tube-like sustain and overload characteristics to be obtained at relatively low levels as is often required by motel/hotel room and home practice situations.

In order for a practice amp to be worthy of the name, it must be able to reproduce the tonality and harmonic content of larger stage equipment . . . but at a reduced and controllable level. The Audition™ has a full array of equalization controls including the vital middle control as necessary for achieving the rich, full sustain so often required in contemporary music. Also, we have incorporated the "Full Thick" feature into the high equalization control which drastically alters the tonality of the equalization system by adding significant amounts of upper mid frequencies which creates a full "thick" midrange tonality.

Rugged 6" materials are used in the cabinetry, while the electronics are powered by a full wave silicon rectifier feeding a larger filter bank to allow maximum performance from the Audition's™ rugged 12 watt power amplifier. This new power amp is protected from transients as well as short circuits and is capable of significantly more acoustic output than normal 12 watt amps because of the unique and exclusive design of the power supply and output stage. A specially designed 8" speaker has been fitted to project the carefully contoured frequency response and tremendous dynamic range of this powerful little amp.

To make the Audition™ even more versatile, a headphone jack has been included on the front panel. When the headphone system is in operation, the internal speaker is cut off, making a totally private rehearsal possible. The unit also contains a preamp out jack on the front panel to allow driving external power amps, tape decks, etc. Recognizing that the busy professional must practice and compose while en route, we have included a 12/18 volt d.c. receptacle on the rear chassis to enable portable use in vehicles through use of our optional 12v accessory patch cord.

The performance, features and overall construction of the Audition™ make it unique in its power category. As with almost any reasonably complex system, experimentation, understanding, and a few hours use are the keys to achieving full utilization of this unit's impressive capabilities.
