GENERAL DESCRIPTION

Today's sound reinforcement requirements have evolved over the years as musical styles, sound pressure level requirements, and advances in technology interrelated. For years, PA systems were simple mixer/power amps until performers and audiences demanded state-of-the-art performance that required separate mixer/power amps. Up until very recently, extremely high quality mixers with integrated power amps were not technically and/or economically feasible. Peavey, one of the world's foremost producers of sound reinforcement equipment, has developed a comprehensive range of new components, packaging techniques, special circuitry, transformers, and connectors to make the production of an integrated state-of-the-art system technically and economically feasible for the first time.

The new XR-800/XR-1200 Powered Mixing Console offers the most flexibility to ever be featured in one compact package. The system includes stereo (dual channel) output with dual Sub Master assignment capability mixing into a sum control which allows for monaural operation. Aside from the normal stereo mixing situation, the XR-800/XR-1200 offers additional features such as two 9-band graphic equalizers, two 200 watt power amplifiers, two separate monitor mixes (A & B), PFL (pre fade listen), normal stereo headphone system, one effects system, built-in reverb, DDT™ compression on each power amp, and pre send and return on each channel. The XR-1200 features twelve low impedance mic level inputs and twelve high impedance inputs, ten-segment LED level indicators for A & B mains and monitors A & B, and also a complete patch panel at the back of the system for patching out to other systems and for bringing other signals into the master section of this system. The XR-800 includes identical features listed above except there are only eight channels with eight mic inputs and eight line level inputs.
