

Pedigree Analysis Question Sheet

Version B

The following pedigree represents the inheritance pattern for the sex-linked, recessive trait colour-blindness in humans. The person making this pedigree did NOT identify the carriers of the trait, just those with or without colour blindness. You have to identify the genotypes of all individuals, by writing the genotype clearly above the number. To do this you will use the allele symbols X^B for normal colour vision and X^b for the colour-blindness. You must also use the appropriate symbols for the genders. Fill in the genotypes of each of the 23 individuals shown. If the complete genotype can not be determined then the symbol X^- MUST be used for the unknown allele.
