Wheeling the Rig provides an in depth examination of fire apparatus vehicle dynamics This is not your average driver
training textbook Fire apparatus operators must understand how a vehicle maneuvers at roadway speed and more
importantly why does it crash Just as a doctor cannot heal the human body without a thorough understanding of anatomy and
physiology an emergency vehicle operator cannot safely drive a fire apparatus without an in depth knowledge of vehicle
dynamics Drive to Survive goes beyond talking about pump operations aerial operations and preventative maintenance it fills
in the gaps between vehicle dynamics and crash causation After 15 years of training and research Chris Daly developed a
training program combining his fire service and crash reconstruction training experience This book provides an in depth
knowledge of topics required in the following NFPA standards NFPA 1002 Standard for Fire Apparatus Driver Operator
Professional Qualifications NFPA 1451 Standard for Fire and Emergency Service Vehicle Operations Training Programs
NFPA 1500 Standard on Fire Department Occupational Health and Safety Program Fire apparatus operators will learn the
limits of driving an emergency vehicle and will understand that no matter how long they have been driving or how good they
think they are at some point physics will take over and the vehicle will lose control We can reduce the number of emergency
vehicle crashes throughout the world by addressing key issues and providing emergency vehicle operations course EVOC
instructors with methods to convey these concepts Concepts you learn in this book relate to more than just driving a fire
apparatus These principles apply to anyone who drives a vehicle including your family members and loved ones Oil & Gas
