Penser et agir avec la nature Catherine Larrère, Raphaël Larrère, 2018-06-14 *The Unconstructable Earth* Frédéric Neyrat, 2018-10-16 Winner Grand Prize French Voices Award for Excellence in Publication and Translation The Space Age is over Not at all A new planet has appeared Earth In the age of the Anthropocene the Earth is a post natural planet that can be remade at will controlled and managed thanks to the prowess of geoengineering This new imaginary is also accompanied by a new kind of power geopower that takes the entire Earth in its social biological and geophysical dimensions as an object of knowledge intervention and governmentality In short our rising awareness that we have destroyed our planet has simultaneously provided us not with remorse or resolve but with a new fantasy that the Anthropocene delivers an opportunity to remake our terrestrial environment thanks to the power of technology Such is the position we find ourselves in when proposals for reengineering the earth s ecosystems and geosystems are taken as the only politically feasible answer to ecological catastrophe Yet far from being merely the fruit of geo capitalism this new grand narrative of geopower has also been activated by theorists of the constructivist turn ecomodernist postenvironmentalist accelerationist who have likewise called into question the great divide between nature and culture With the collapse of this divide a cyborg hybrid flexible nature has been built an impoverished nature that does not exist without being performed by technologies that proliferate within the space of human needs and capitalist imperatives Underneath this performative vision resides a hidden anaturalism denying all otherness to nature and the Earth no longer by externalizing it as a thing to be dominated but by radically internalizing it as something to be digested Constructivist ecology thus finds itself in no position to confront the geoconstructivist project

with its claim that there is no nature and its aim to replace Earth with Earth 2 0 Against both positions Neyrat stakes out the importance of the unconstructable Earth Against the fusional myth of technology over nature but without returning to the division between nature and culture he proposes an ecology of separation that acknowledges the wild subtractive capacity of nature Against the capitalist technocratic delusion of earth as a constructible object but equally against an organicism marked by unacknowledged traces of racism and sexism Neyrat shows what it means to appreciate Earth as an unsubstitutable becoming a trajet that cannot be replicated in a laboratory Underway for billions of years withdrawing into the most distant past and the most inaccessible future Earth escapes the hubris of all who would remake and master it This remarkable book which will be of interest to those across the humanities natural sciences and social sciences from theorists to shapers of policy recasts the earth as a singular trajectory that invites humans to turn political ecology into a geopolitics

Ecology and Literatures in English Françoise Besson,2018-12-14 In all latitudes writers hold out a mirror leading the reader to awareness by telling real or imaginary stories about people of good will who try to save what can be saved and about animals showing humans the way to follow Such tales argue that in spite of all destructions and tragedies if we are just aware of and connected to the real world around us to the blade of grass at our feet and the star above our heads there is hope in a reconciliation with the Earth This may start with the emergence or rather the return of a nonverbal language restoring the connection between human beings and the nonhuman world through a form of communication beyond verbalization Through a journey in Anglophone literature with examples taken from Aboriginal African American English Canadian and Indian works this book shows the role played by literature in the protection of the planet It argues that literature reveals the fundamental idea that everything is connected and that it is only when most people are aware of this connection that the world will change Exactly as a tree is connected with all the animal life in and around it texts show that nothing should be separated From Shakespeare's theatre to ecopoetics from travel writing to detective novels from children's books to novels all literary genres show that literature responds to the violence destroying lands men and nonhuman creatures whose voices can be heard through texts **Rethinking Nature** Aurélie Choné,Isabelle Hajek,Philippe Hamman,2017-05-18 This textbook provides an overview of different ways of conceptualising nature in epistemological terms reflecting the tensions between the polarities of humans as masters or protectors of nature or as part of or outside of nature

Urban and Metropolitan Rivers Joaquim Farguell Pérez,Albert Santasusagna Riu,2024-08-27 This book provides a detailed description of fluvial processes and their influence on urban sites During the urban expansion of modern cities throughout the twentieth century rivers have become a source of problems during high flood events However due to growing social pressure especially in dense cities rivers are viewed as new leisure areas given that they also provide highly valuable ecosystem services People seek open and environmentally friendly spaces amidst the dense street networks of cities Yet we should not forget that rivers are not merely domesticated elements of nature for leisure purposes only Flooding risks and

damages are possible within urban environments How should we address the social and ecological interactions How should we plan for these complexities to meet the growing social requirements and needs while respecting river dynamics Hydrologists geomorphologists engineers geographers and urban planners could leverage the knowledge and examples provided to enhance the interaction between nature and society in the growing cities of the twenty first century **Critique**

of Pure Nature Simona Stano,2023-11-27 This book challenges the Western contemporary praise for Nature From food to body practices from ecological discourses to the Covid 19 pandemic contemporary imaginaries abound with representations of an ideal pure Nature essentially defined according to a logic of denial of any artificial modified manipulated in short cultural aspect How should we contextualise and understand such an opposition especially in light of the rich semantic scope of the term nature and its variability over time And how can we if we actually can envisage alternative models and approaches capable of better accounting for such richness and variability The author addresses these fundamental issues combining an initial theoretical problematisation of the concept of nature and its evolution from classical philosophy to the crucial changes occurred through the Middle Ages the Renaissance Romanticism and the modern era finally considering recent insights in philosophy sociology cultural anthropology and semiotics with the analysis of its discursivisation from the iconography of Mother Nature between the past and the present to the representation of catastrophic events in fictional and non fictional texts from clean eating and other popular food trends to the ambivalence of the naked body between its supposed natural ascription and its multiple cultural characterisations Thus she introduces a critique of pure Nature providing a systematic study of the way nature is attributed meaning and value in some of today s most relevant discourses and practices and finally tracing a possible path towards an internatural turn *Œuvres de Victor Cousin: Cours d'histoire de la philosophie morale.
