The Post-American Middle East Laurent A. Lambert, Moosa Elayah, 2023-06-17 After two decades of War on Terror it is particularly important for both academic and policy purposes to clearly understand why the US formidable mobilization of means and might has transformed into a such a blatant geostrategic defeat of the US and its allies in the broad Middle East This is all the more paradoxical that the WOT achieved a series of tactical victories such as the toppling of hostile regimes in Afghanistan Iraq and Libya the crippling of the national economies of enemy states by sanctions the successful targeted killing of lead terrorist Usama Bin Laden ISIS cult leaders Abu Bakr Al Baghdadi and his successor etc So why have these tactical victories not led to what was supposed to become according to the US government a Greater Middle East With most authors being from or living in the Middle East this book is unique as it brings perspectives and answers from the region This is crucially important as we are entering we argue the era of a Post American Middle East Chapters 1 and 10 are available open access under a Creative Commons Attribution 4.0 International License via link [springer.com](https://www.springer.com)

International Politics of Recognition Thomas Lindemann, Erik Ringmar, 2015-11-17 The origins of international conflict are often explained by security dilemmas power rivalries or profits for political or economic elites Common to these approaches is the idea that human behaviour is mostly governed by material interests which principally involve the quest for power or wealth The authors question this truncated image of human rationality Borrowing the concept of recognition from models developed in philosophy and sociology this book provides a unique set of applications to the problems of international conflict and argues that human actions are often not motivated by a pursuit of utility maximisation as much as they are by a quest to gain recognition This unique approach will be a welcome alternative to the traditional models of international conflict

Causes of War Thomas Lindemann, 2024-08-22 Theories on the origins of war are often based on the premise that the rational actor is in pursuit of material satisfaction such as the quest for power or for wealth These perspectives disregard the need for homo symbolicus the preservation of a positive self image for both emotional and instrumental reasons A good reputation ensures authority and material resources Non recognition can be as much as an explanation of war as that of other explicative variables Two empirical studies examining the role of non recognition in great power conflicts and in international crises will demonstrate the value of this symbolic approach

L'Europe sous tensions Mathieu Petithomme, 2010-01-01 L'Union européenne est embourbée depuis une dizaine d'années dans une crise de légitimité majeure. Ce livre analyse les tensions permanentes qui travaillent le continent unifié. Objet politique non identifiable par bon nombre de citoyens ordinaires et loin de susciter une adhésion générale son mode de fonctionnement et son orientation politique sont souvent contestés par le mouvement altermondialiste par les organisations syndicales et une frange non négligeable d'élus au Parlement européen. L'intégration l'Union européenne continue d'être perçue comme un horizon politique désirable.

Rendre la guerre possible Christophe Wasinski, 2010 Cet ouvrage aborde la question de la guerre contemporaine par un biais original. Dans les sciences humaines de nombreuses hypothèses circulent proposées des causes des guerres. Cependant ces mêmes sciences ne se sont peut-être pas assez interrogées sur le rôle de la pensée stratégique dans l'émergence et la perpétuation du phénomène. Prenant appui sur la pensée de Michel Foucault et sur les récents travaux constructivistes en relations internationales cette analyse revient sur le développement de ce savoir très particulier et questionne son développement sa structuration et sa diffusion par-delà les époques et les frontières. Pour ce faire l'auteur analyse la dynamique des dispositifs classiques de combat qui apparaissent sur les champs de bataille européens au sortir du Moyen Âge et qui vont avoir un impact durable sur la formation de la pensée stratégique. Il met ensuite en évidence les implications militaires de la redécouverte de la perspective graphique dans la constitution d'une grammaire narrative militaire spécifique. Enfin il passe en revue les mécanismes de formation d'un édifice stratégique intellectuel transnational ainsi que ses ramifications dans les domaines de l'histoire militaire et de la géopolitique.

L'État africain et sa diaspora face à la mondialisation Paul Elvic Batchom, Patrice Moundounga Mouity, 2021-03-22 La question de la diaspora en Afrique est devenue une problématique loquente au regard des interrogations sur son apport sa participation politique son impact sur le développement de l'Afrique et sa contribution prééminente aux conflits en vigueur sur le continent. Mettant en commun les réflexions de plusieurs jeunes politologues africains francophones cet ouvrage contribue à l'analyse du phénomène de la diaspora en tant qu'expression de l'entre-deux de la nation et les multiples incidences d'une telle double présence sur la politique dans les pays d'origine.

Penser la guerre Thomas Lindemann, 2008-11-01 Les hypothèses traditionnelles dans l'explication de la violence internationale la guerre pour la sécurité et la guerre pour le profit ne sont pas nécessairement les plus pertinentes. Par contre la perspective de la guerre pour l'affirmation identitaire permet de poser de nouvelles questions.

gard de l'éclosion des conflits armés Quel est le rôle des identités et des normes dans le déclenchement des guerres La violence est-elle générée par des comportements de stigmatisation Valeurs, métier et action Éric Letonturier, 2011 La livraison d'octobre 2011 vol 61 numéro 2 de L'Année sociologique est consacrée à l'institution militaire Les études réunies par Eric Letonturier portent sur les valeurs qui l'animent les logiques professionnelles qui la traversent et les finalités opérationnelles qui lui sont assignées La spécificité militaire la représentativité des armées leur reconnaissance sociale ou encore les lieux de mémoire de la guerre et la gestion des motions sur les théâtres d'opération constituent quelques uns des thèmes qui s'y trouvent abordés
