## **Pentagon Report China Military:**

**China's Military Modernization** Richard D. Fisher, Jr., 2008-09-30 China's rise to global economic and strategic eminence with the potential for achieving pre-eminence in the greater Asian region is one of the defining characteristics of the post Cold War period. This work offers a basic understanding of the military strategic basis and trajectory of a rising China, provides background and outlines current and future issues concerning China's rise in strategic military influence. The next decade may witness China's assertion of military or strategic pressure on Japan, the Korean Peninsula, India, the South China Sea, the Taiwan Strait, Central Asia, or even on behalf of future allies in Africa and Latin America. While conflict is not a foregone conclusion as indicated by China's increasing participation in many benign international organizations, it is a fact that China's leadership will pursue its interests as it sees them, which may not always coincide with those of the United States, its friends, and allies. Until now, no single volume has existed that provides an authoritative, comprehensive, and concise description of China's evolving geo-strategy or of how China is transforming its military to carry out this strategy. Fisher examines how China's People's Liberation Army (PLA) remains critical to the existence of the Chinese Communist government and looks at China's political and military actions designed to protect its expanded strategic interests in both the Asia-Pacific and Central to Near Asian regions. Using open sources, including over a decade of unique interview sources, Fisher documents China's efforts to build a larger nuclear force that may soon be protected by missile defenses, modern high technology systems for space, air, and naval forces, and how China is now beginning to assemble naval, air, and ground forces for future power projection missions. His work also examines how the United States and other governments simultaneously seek greater engagement with China on strategic concerns while hedging against its rising power. Although China faces both internal and external constraints on its rise to global eminence, it cannot be denied that China's government is pursuing a far-reaching strategic agenda.

**Panda Hedging**, 2006 The Pentagon's fifth annual Report on the Military Power of the People's Republic of China was sent to Congress this week. Even more than its predecessors, this year's report is unsettling with myriad disturbing revelations: the military balance across the Taiwan Strait has now tipped in China's favor; China's military doctrine appears to view Taiwan as a stepping stone to a broader and farther-reaching strategic presence in the Western Pacific; China's military has made major advances in strategic weapons; the Chinese military is in the midst of a debate on a new, more threatening nuclear doctrine; and China is far from behaving as a responsible stakeholder in the global community. As the new report confirms, hedging has become the watchword in China relations in Washington. It's about time.

logics of military competition and economic interdependence at play in US China relations *Trading with the Enemy* examines how the United States has balanced its potentially conflicting national security and economic interests in its relationship with the People's Republic of China (PRC). To do so, Hugo Meijer investigates a strategically sensitive yet under-explored facet of US China relations: the making of American export control policy on military-related technology transfers to China since 1979. *Trading with the Enemy* is the first monograph on this dimension of the US China relationship in the post-Cold War. Based on 199 interviews, declassified documents, and diplomatic cables leaked by Wikileaks, two major findings emerge from this book. First, the US is no longer able to apply a strategy of military technology containment of China in the same way it did with the Soviet Union during the Cold War. This is because of the erosion of its capacity to restrict the transfer of military-related technology to the PRC. Secondly, a growing number of actors in Washington have reassessed the nexus between national security and economic interests at stake in the US China relationship by moving beyond the Cold War trade-off between the two in order to maintain American military preeminence vis-à-vis its strategic rivals. By focusing on how states manage the heterogeneous and potentially competing security and economic interests at stake in a bilateral relationship, this book seeks to shed light on the evolving character of interstate rivalry in a globalized economy where rivals in the military realm are also economically interdependent.

*Axis of Convenience* Bobo Lo, 2009-08-01 Few relationships have been as misunderstood as the strategic partnership between Russia and China. Official rhetoric portrays it as the very model of international cooperation. Moscow and Beijing claim that ties are closer and warmer than at any time in history. In reality, however, the picture is highly ambiguous. While both sides are committed to multifaceted engagement, cooperation is complicated by historical suspicions, cultural prejudices, geopolitical rivalries, and competing priorities. For Russia, China is at once the focus of a genuine convergence of interests and the greatest long-term threat to its national security. For China, Russia is a key supplier of energy and weapons but is frequently dismissed as a self-important power whose rhetoric far outstrips its real influence. *Axis of Convenience* cuts through the mythmaking and examines the Sino-Russian partnership on its own merits. It steers between the overblown interpretation of an anti-Western, particularly anti-American alliance and the complacent assumption that past animosities and competing agendas must always divide the two nations. Their relationship reflects a new geopolitics, one that eschews formal alliances in favor of more flexible and opportunistic arrangements. Ultimately, it is an axis of convenience driven by cold-eyed perceptions of the national interest. In evaluating the current state and future prospects of the relationship, Bobo Lo assesses its impact on the evolving strategic environments in Central and East Asia. He also analyzes the global implications of rapprochement between Moscow and Beijing, focusing in particular on the geopolitics of energy and Russia-China-US triangularism.

*Reinventing the Alliance* G. Ikenberry, T. Inoguchi, 2003-12-18 This is an edited volume that examines the US-Japan security alliance, the key to US-Japanese relations since the end of US occupation in the 50s. The alliance has long been a source of both co-operation and stress between the two nations but with rapid

changes in Asia it has grown more problematic This book brings American and Japanese specialists together to examine the alliance within the wider regional environment and to determine whether and how the bilateral alliance can evolve and remain at the core of the region's security order *Chinese Strategy and Military Modernization in 2015* Anthony H. Cordesman, Steven Colley, 2016-01-12 China's emergence as a global economic superpower and as a major regional military power in Asia and the Pacific has had a major impact on its relations with the United States and its neighbors China was the driving factor in the new strategy the United States announced in 2012 that called for a rebalance of U S forces to the Asia Pacific region At the same time China's actions on its borders in the East China Sea and in the South China Sea have shown that it is steadily expanding its geopolitical role in the Pacific and having a steadily increasing impact on the strategy and military developments in other Asian powers **Joint Force Quarterly**, 2006 **Department of Defense Authorization for Appropriations for Fiscal Year 2007** United States. Congress. Senate. Committee on Armed Services, 2007 **A War Like No Other** Richard C. Bush, Michael E. O'Hanlon, 2007-04-01 Nobody approaches the objectivity and precision of Bush and O Hanlon when it comes to analysis of the military and political dimensions of the Taiwan issue This is one challenge that U S policymakers and military strategists cannot afford to get wrong and scholars cannot afford to ignore Michael Green former Senior Director for Asian Affairs National Security Council The Showdown to Come In 1995 during a heated discussion about that year's Taiwan crisis a Chinese general remarked to a U S diplomat In the end you care more about Los Angeles than you do about Taipei In a single sentence he both questioned the level of America's commitment to a longtime ally and threatened massive perhaps nuclear retaliation should the United States intervene militarily on Taiwan's behalf In the end President Clinton sent two aircraft carriers to the region and China ceased its military exercises in the Taiwan Strait A decade later however China is much stronger both economically and militarily and it holds a significant amount of America's national debt If another Taiwan crisis should occur as it almost certainly will would China back down In *A War Like No Other* you'll discover how little it would take to transform the close cooperation and friendly rivalry between the United States and the People's Republic of China into the first ever shooting war between two nuclear powers This chilling look into one possible future offers thoughtful advice to both governments on how to reduce the chances of such a nightmare actually occurring Two Brookings Institution scholars offer specific prescriptions on how the two nations can improve communications especially in times of crisis avoid risky behavior even when provoked and above all remember which buttons not to push **China's Global Strategy** Jenny Clegg, 2009-01-20 This book takes a look at China's position a range of global issues arguing that its multipolar diplomacy offers a strategy to constrain US hegemony Many people assume that China will follow an imperialistic strategy and stand in direct conflict with the American empire However China is in fact taking a multilateral approach offering real assistance to developing countries and helping to build the institutions required to run a multipolar world Whilst acknowledging China's own internal difficulties the book argues that its international consensus

building could lead to a more peaceful and equitable world      **China** Joseph Y.S. CHENG,2012-05-01 This volume presents a timely assessment of the Hu Wen Administration at the juncture of preparing a change of China's leadership in 2012-13. The assessment is important because the administration's apparent success tends to create a path dependent orientation on the part of its successor. Bringing together a collection of nineteen major essays, this book offers a fresh perspective of evaluating the performance and achievements of China in the Hu Wen era in terms of economic development, the establishment of a rudimentary social security system and her rising international status. The new opportunities and challenges facing China and how will the likely successors Xi Jinping and Li Keqiang handle those opportunities and challenges as well as new policy programmes will also be discussed in greater detail. Each essay is written by experts and scholars from different academic disciplines and backgrounds to provide readers with a unique overview of their respective areas of expertise.      *Playing with Fire* John F. Copper,2006-05-30 One of the most pressing issues for China and the world at large is the continuing presence of an independence minded Taiwan off China's southern coast. Recent modernization efforts within the Chinese military and tough remarks by Chinese officials have alarmed many in Washington and caused others to question America's commitments in the region. Copper details events of recent decades to give the reader a complete picture of potential flash points concerning Taiwan. An expert who has studied the region for more than thirty years, he saw firsthand the turmoil that followed the recent Taiwanese elections. Drawing upon his interdisciplinary research on the political, economic and military issues surrounding the U.S.-Taiwan-China triangle, he assesses the various aspects of this complex relationship and comments on what may come from playing with fire. Daily headlines and news stories remark upon the growing economic might of China. Analysts note that this increasing economic influence will undoubtedly lead to increasing political engagement on a global level. It is clear that the United States can no longer ignore what Napoleon called the sleeping giant.
