

# Charging Instructions

## NOTE:

To disconnect the charge cable:

1. Press and hold the button on the connector handle to release the latch.

**NOTE:** You can also release the latch using the touchscreen or mobile app, or by pressing and holding the rear trunk button on the key fob.

2. Pull the connector from the charge port. The charge port door automatically closes.

To disconnect the charge cable when using an adapter at a public charge station:

1. Unlock Model Y.
2. While holding the public charging handle in one hand and the adapter in the other hand, press and hold the button on the public charging handle and pull both outwards, removing the handle and adapter at the same time.

**NOTE:** If the charging station handle separates from the adapter, leaving the adapter in Model Y, use the touchscreen to unlock the charge port.

3. Press and hold the button on the charging handle again to release the adapter from the public charging handle.

**NOTE:** The charge port door automatically closes within approximately 10 seconds of removing the connector from the charge port.

**CAUTION:** Tesla strongly recommends leaving Model Y plugged in when not in use. This maintains the Battery at the optimum level of charge.

**CAUTION:** Model Y does not shift out of Park if the charge port is unable to determine whether a charging cable is plugged in. Ensure the charging cable is unplugged and follow the instructions on the touchscreen to proceed (see Park on page 54).

## Charge Settings

Access charge settings by touching **Controls > Charging** when Model Y is in Park. You can also touch the battery icon on the touchscreen to access charge settings.

1 - 132 mi

2

1. **Driving distance:** Displays the total estimated driving distance available.
2. **Set limit:** Adjust the charge limit by dragging the arrow below the battery to indicate the level of charging you want. The setting you choose applies to immediate and scheduled charging sessions.

**NOTE:** A portion of the battery image may appear blue. This indicates that a small portion of the energy stored in the battery is not available because the battery is cold. This is normal and no reason for concern. When the battery warms up, the blue portion no longer displays.

You can further adjust charge settings:

- **Open Charge Port, Unlock Charge Port and Stop Charging:** When not charging, touch **Open Charge Port** or **Unlock Charge Port** to open the charge port door or to unlock the charge cable from the charge port. Use **Stop Charging** when you are finished charging.
- **Charge current at this location:** The current automatically sets to the maximum current available from the attached charge cable, unless it was previously reduced to a lower level. If needed, touch - or + to change the current (for example, you may want to reduce the current if you are concerned about overloading a domestic wiring circuit shared by other equipment). It is not possible to set the charging current to a level that exceeds the maximum available from the attached charge cable. When you change the current, Model Y remembers the location. If you charge at the same location, you do not need to change it again.

**NOTE:** If Model Y is charging and detects unexpected fluctuations in input power, the charging current is automatically reduced by 25%. For example, a 40 amp current is reduced to 30 amps. This automatic current reduction increases robustness and safety in situations when an external problem exists (for example, a home wiring system, receptacle, adapter or cord is unable to meet its rated current capacity). As a precaution, when Model Y automatically reduces current, it saves the reduced current at the charging location. Although you can manually increase it, Tesla recommends charging at the lower current until the underlying problem is resolved and the charging location can provide consistent power.

- **Schedule:** Depending on the setting you select by touching **Switch to Scheduled Departure/Scheduled Charging**, this displays either a departure time for when the vehicle should be preconditioned and/or charged by or a time to start charging (see **Scheduled Charging** and **Scheduled Departure** on page 169).
- **Supercharging:** Displays supercharger usage fees, the location, the time that charging started, and a cost estimate for the session (see **Supercharger Usage Fees** and **Idle Fees** on page 169).
