meaningful and fun way for children to develop engineering habits of mind as they explore concepts in force and motion properties of objects and how an object's properties affect its movement. In the process, children develop spatial thinking that is essential for future careers in STEM. The text also offers guidance for arranging the physical, intellectual, social, emotional, and promotional environments of a classroom to embrace the natural integration of literacy learning. Each volume in this series includes guidance for forming partnerships with families and administrators that support STEM learning vignettes showing educators and children engaging in inquiry, learning tips for selecting materials, modifications and accommodations for diverse learners, ways to establish adult learning communities that support professional development, and more.

Book Features: Alignment with both the Head Start Early Learning Outcomes Framework (ELOF) and the NGSS Science and Engineering Practices with specific descriptions of how those science and engineering practices in Ramps and Pathways look and feel in Pre-K-2 classrooms. Examples of how to integrate literacy learning in a meaningful way. Descriptions of how the open-ended nature of ramps and pathways aligns with the Universal Design for Learning Framework (UDL) Guidance to help teachers anticipate and plan for all children to become purposeful, motivated, resourceful, knowledgeable, strategic, and goal directed about learning. Examples of how to stage and introduce and support children's designs to develop engineering habits of mind, systems thinking, optimism, creativity, communication, collaboration, attention to ethical considerations. A meaningful and healthy context to grow children's executive function skills (EFs) including inhibitory control, working memory, and cognitive flexibility.

Tested: Linda Perlstein, 2025-03-14. The pressure is on at schools across America. In recent years, reforms such as No Child Left Behind have created a new vision of education that emphasizes provable results, uniformity, and greater attention for floundering students. Schools are expected to behave more like businesses and judged almost solely on the bottom-line test scores. To see if this world is producing better students, Linda Perlstein immersed herself in a suburban Maryland elementary school. The resulting portrait, detailed, human, and truly thought-provoking, is marked by the same narrative gifts and expertise that made *Not Much Just Chillin'* so illuminating. The school, once deemed a failure, is now held up as an example of reform done right. Perlstein explores the rewards and costs of that transformation through the experiences of the people who lived it. Nine-year-olds meditate to activate their brains before exams, and kindergartners write paragraphs. Teachers attempt to address diverse needs at the same time they are expected to follow daily scripts and feel compelled to focus on topics that will be tested at the expense of those that won't. The principal attempts to keep it all together in the face of immense challenges. Perlstein provides the first detailed view of how new education policies are modified by human realities. Tested will be talked about, thought about, written about, and will almost certainly play an important role in the national debate as the federal education law comes up for renewal.
