the *Mirabilia* or *De mirabilibus auscultationibus* On Marvelous Things Heard and its engagement with the natural sciences The first two chapters deliver an introduction to this work one a discussion of the history of the text and the other a discussion of Aristotelian epistemology and methodology and the role of the *Mirabilia* in that context This is followed by eight chapters that together are effectively a commentary on those sections of the *Mirabilia* with close connections to Aristotle's *Historia animalium* and to a number of Theophrastus scientific treatises Finally the volume ends with two chapters on thematic topics connected to natural science running throughout the work namely color and disease The Aristotelian *Mirabilia* and Early Peripatetic Natural Science should prove invaluable to scholars and students interested in the ancient Greek study of nature ancient philosophy and Aristotelian science in particular **Polymer Physics** Leszek A.
