Carducci,Lisa Kaiser,2015-06-11 Although shyness is a very common trait and almost everyone experiences it at some level it s often misunderstood That s because few of us ask about the frustration anxiety pain and triumphs in the life of a shy person These experiences remain hidden and shy people may feel that nobody wants to know what s going on in their hearts minds and souls Their silence often isolates them In Shyness The Ultimate Teen Guide Bernardo J Carducci and Lisa Kaiser help young adults address a concern that millions

of teens around the world experience The authors emphasize that shyness is not a character flaw that needs to be cured or that shy people need to remake their personalities and suddenly become extroverted Instead this book provides tips and strategies to help shy teens control their shyness by changing the thoughts feelings and behaviors that hold them back from reaching their true potential Chapters in this book look at myths about shyness what makes people shy what it feels like to be shy how shyness affects identity how shy teens can meet people and make friends how shy people can tackle some of their biggest fears like dating challenges beyond high school such as leaving for college and developing a career Throughout this book teens learn that the best kept secret about shyness is that there s nothing wrong with it Designed to help readers understand and gain a greater appreciation for who they are Shyness The Ultimate Teen Guide will teach young adults and those closest to them what it means to be successfully shy

Emotions and Leadership in Organizations and Educational Institutes Osman Titrek, Anna Stavicka, Ana Campina, Gozde Sezen-Gultekin, Carlos Francisco De Sousa Reis, 2023-11-28 Emotion management is an important source of social capital and synergy for organizations Managers have a great role in the creation of this synergy A manager who can cope with their emotions indirectly contributes to organizational effectiveness This situation is especially important in human oriented organizations providing services rather than goods such as educational institutions Leadership is a process of social influence which maximizes the efforts of others towards the achievement of a goal Leadership stems from social influence rather than authority or power In terms of system approach the input output process and feedback of educational organizations are always related to human behaviors Therefore organizations must address the nature of human beings in all of their managerial processes Although organizations in which people are at the foreground try to continue their functioning on a rational and formal basis throughout the managerial process they sometimes have to manage emotional and informal phenomena In this case there is a need for managers and school leaders who can shape the rationale in line with the requirements of human nature What is expected from this administrator is that they do not ignore human needs and emotions while providing the management of educational institutions For this reason these managers should be leaders rather than executives who only work in a formal framework of organization management Moreover principals and teachers should also be leaders in all educational processes Emotions are the main catalyst of positive organizational culture Leaders can create an effective organizational culture with the main source of positive emotions between employers Positive emotions also motivate employees for organizational purposes If a leader wishes to create and maintain an effective organizational culture it is essential to support positive behavior and emotional climate in their institutes and schools Leaders school managers and teachers therefore need to develop emotion management abilities Educational organizations need to shape their organizational culture climate and psychology to support their leaders in efficiently managing their employees emotions Up to now this topic has been usually addressed as the main catalyst and a sub dimension of emotional intelligence Moreover current evidence classifies social and empathy skills as

other sub dimensions of emotional intelligence For this reason this collection of peer reviewed articles will draw attention to the contemporary term emotional management and contribute to educational fields by means of exploring the relationship between emotions and leadership

School Management and Pupil Behaviour Neville Jones,1989 The book provides a variety of analyses and a range of advice on the wider issue of the effectiveness of education It is felt that the most significant ways in which to improve pupil behaviour may well be through a fresh approach to styles of teaching and learning
