

Welcome to the most advanced modeling amplifier on the planetthe VYPYR™.

Whether you have purchased a VYPYR 15 or a VYPYR Tube 120 you have made the decision to participate in a revolution in amp modeling and a new standard for tone.

After 43 years of experience building tube amplifiers and working with analog distortion, Peavey has finally combined true analog distortion with advanced digital effects algorithms to create the best sounding modeling amp on the planet, period. The VYPYR is significantly different from other modeling amplifiers for several reasons, but the primary reason and key to tone is ANALOG distortion. Years spent perfecting our patented TransTube® technology have paid off in allowing us to combine REAL ANALOG distortion with one of the most advanced processors in ANY modeling amplifier, the 266 MHz Dual Core SHARC. This amazing combination of technology allows the VYPYR to operate up to five effects simultaneously while maintaining the real sound of an ANALOG amplifier. What this means to you is unlike our competition, your amp will not only sound great at home, but incredible on stage and in the studio as well.

CONGRATULATIONS and enjoy your VYPYR.....

Before you begin playing through your amplifier, it is very important to ensure that the product has the proper AC line voltage supplied. You can find the proper voltage for your amp printed next to the IEC line (power) cord on the rear panel of the unit. Each product feature is numbered. Refer to the front panel diagram in this manual to locate the particular features next to its number.

VENTILATION: For proper ventilation, allow 24" clearance from nearest combustible surface.
