Curse of the Narrows Laura M. Mac Donald, 2009-05-26 In 1917 the port of Halifax Nova Scotia was crowded with ships leaving for war torn Europe On December 6th two of them the Mont Blanc and the Imo collided in the Narrows a hard to navigate stretch of the harbor Ablaze and with explosions on her deck filling the sky the Mont Blanc grounded against the city's docks As thousands rushed to their windows and into the streets to watch she exploded with such force that the 3 121 tons of her iron hull vaporized in a cloud that shot up more than 2 000 feet the explosion was so unusual that Robert Oppenheimer would study its effects to predict the devastation of an atomic bomb The blast caused a giant wave that swept over parts of the city followed by a slick black rain that fell for ten minutes Much of the city was flattened and not one in 12 000 buildings within a 16 mile radius left undamaged More than 1 600 Halifaxians were killed and 6 000 injured and within twenty four hours a blizzard had isolated Halifax from the world Set vividly against the background of World War I Curse of the Narrows is the first major account of the world's largest pre atomic explosion the epic relief mission from Boston and the riveting trial of the Mont Blanc's captain and pilot Laura M Mac Donald is as adept at describing the dynamics of a chain reaction explosion as she is at chronicling unforgettable human dramas of miraculous survival unfathomable loss and the medical breakthroughs in pediatrics and eye surgery that followed the disaster Using primary sources many of which haven't been read in decades and with a wonderful feel for narrative history Mac Donald chronicles one of the most compelling and dramatic events of the 20th century

Pediatric Acute Care Beth Nachtsheim Bolick, Karin Reuter-Rice, Maureen A. Madden, Paul N. Severin, 2020-06-20 Selected for Doody's Core Titles 2024 in Critical Care Stay up to date on the latest evidence and clinical practice in pediatric acute care with the definitive textbook in the field Now in its second edition Pediatric Acute Care A Guide for Interprofessional Practice takes an evidence based interprofessional approach to pediatric acute care as it

exemplifies the depth and diversity that is needed for the dynamic healthcare environments in which acutely ill children receive care. Coverage includes how to work with the pediatric patient and family, major acute care disorders and their management, emergency preparedness, common acute care procedures and much more. With contributions from more than 200 practicing clinicians and academic experts, it represents a wide variety of disciplines including medicine, nursing, pharmacy, child life, nutrition, law, integrative medicine, education, public health, and psychology among others. The second edition also features the addition of new physician and nurse practitioner co-editors, as well as extensive content updates including updated evidence-based content throughout the text, the integration of the 2016 IPEC Core Competencies for Interprofessional Collaborative Practice, a new full-color design, and new vivid illustrations throughout.

UNIQUE Interprofessional collaborative approach includes contributions from more than 200 practicing clinicians and academic experts from the U.S. and Canada, including nursing, medicine, pharmacy, child life, nutrition, law, integrative medicine, education, public health, and psychology. Consistent organization within disorder chapters begins with a section on Physiology and continues with sections on Pathophysiology, Epidemiology, and Etiology, Presentation, Differential Diagnosis, Diagnostic Studies, and a Plan of Care that include Therapeutic Management, Consultation, Patient and Family Education, and Disposition and Discharge Planning. Comprehensive content spanning five units divides coverage into introductory information, the approach to the pediatric patient and family, major acute care disorders and their management, emergency preparedness, and common acute care procedures.

NEW Updated evidence-based content has been added throughout to ensure that you're up to date on all topics needed to provide care for pediatric patients in acute inpatient, emergency, transport, and critical care settings.

NEW Full-color design and illustrations enhance learning and make content easier to navigate and digest.

NEW Integration of the 2016 IPEC Core Competencies ensure that you're learning the professional skills and protocols required for effective contemporary interprofessional collaborative practice.

UPDATED Streamlined procedures unit focuses more sharply on need-to-know content.

Diseases of the Liver and Biliary System in Children Deirdre A. Kelly, 2008-04-15. An extremely practical text, this new edition of *Diseases of the Liver and Biliary System in Children* covers the essentials of paediatric hepatology. The range of material is wide and has been revised and updated to include the latest advances. Many helpful algorithms and tables are included, and the references at the end of each chapter have been carefully selected so as to provide the most up-to-date information available. A concluding section comprising some 100 carefully annotated plates completes this text. Containing the contributions of 23 internationally acclaimed authorities active both clinically and in research, the book provides an essential guide to the diagnosis and management of paediatric liver diseases, both common and uncommon, for all those involved in the care of the child with liver disease. *Diseases of the Liver and Biliary System in Children* has become THE REFERENCE of choice for the paediatric gastroenterologist, hepatologist, and surgeon.
