

# CPR GUIDE

## CHILD (1- 8 Years)

In an emergency situation the DRSABCD flowchart must be followed first. If you have done so and deem CPR necessary for the child then follow the diagrams below.

CPR is performed at a ratio of

**30** compressions

**2** rescue breaths

**01** Perform 30 compressions moderately hard and fast - at a rate of **100-120** per minute.

**02** Perform 2 rescue breaths.

Pinch the soft part of the nose and open the child's mouth

Take a breath, form a tight seal and breathe steadily

Watch for the rise and fall of the chest

If an AED is available - turn AED on and follow the AED's instructions.

Pad position for male/female child

Alternate position for male/female child if the pads would touch

**CONTINUE CPR UNTIL THE CHILD BREATHES NORMALLY OR MEDICAL PROFESSIONALS TAKE OVER**

If the child resumes normal breathing then place them in the recovery position and monitor their breathing until an ambulance arrives.

**Recovery position**
