

## Pedigree Charts

Name: \_\_\_\_\_

A pedigree for any family, be it dogs, cats or humans, shows the pattern of inheritance in a family for a specific trait. Males are shown as squares and females are shown as circles. Each generation is shown as a Roman numeral and each person in a generation is numbered. The trait *that is being expressed* is shown as a shaded shape.

Observe the pedigree. Number the generations and each person on the pedigree.

In this family, how many individuals show the trait? \_\_\_\_\_

Which males show the trait? (generation, number)

**The Discourse of Sensibility** Henry Martyn Lloyd,2013-12-12 This volume reconstructs the body of sensibility and the discourse which constructed it The discourse of sensibility was deployed very widely throughout the mid to late eighteenth century particularly in France and Britain To inquire into the body of sensibility is then necessarily to enter into an interdisciplinary space and so to invite the plurality of methodological approaches which this collection exemplifies The chapters collected here draw together the histories of literature and aesthetics metaphysics and epistemology moral theory medicine and cultural history Together they contribute to four major themes First the collection reconstructs various modes by which the sympathetic subject was construed or scripted including through the theatre poetry literature and medical and philosophical treatises It secondly draws out those techniques of affective pedagogy which were implied by the medicalisation of the knowing body and thirdly highlights the manner in which the body of sensibility was constructed as simultaneously particular and universal Finally it illustrates the centrifugal forces at play within the discourse and the anxiety which often accompanied them At the centre of eighteenth century thought was a very particular object the body of sensibility the Enlightenment s knowing body The persona of the knowledge seeker was constructed by drawing together mind and matter thought and feeling And so where the Enlightenment thinker is generally associated with reason truth telling and social and political reform the Enlightenment is also known for its valorisation of emotion During the period intellectual pursuits were envisioned as having a distinctly embodied and emotional aspect The body of sensibility encompassed these apparently disparate strands and was associated with terms including sentimental sentiment sense sensation and sympathy

**Systems: Theory and Practice** Rudolf Albrecht,2012-12-06 There is hardly a science that is without the notion of system We have systems in mathematics formal systems in logic systems in physics electrical and mechanical engineering architectural operating infonnation programming systems in computer science management and PJoduction systems in industrial applications economical ecological biological systems and many more In many of these disciplines formal tools for

system specification construction verification have been developed as well as mathematical concepts for system modeling and system simulation Thus it is quite natural to expect that systems theory as an interdisciplinary and well established science offering general concepts and methods for a wide variety of applications is a subject in its own right in academic education However as can be seen from the literature and from the curricula of university studies at least in Central Europe it is subordinated and either seen as part of mathematics with the risk that mathematicians who may not be familiar with applications define it in their own way or it is treated separately within each application field focusing on only those aspects which are thought to be needed in the particular application This often results in uneconomical re inventing and re naming of concepts and methods within one field while the same concepts and methods are already well introduced and practiced in other fields The fundamentals on general systems theory were developed several decades ago We note the pioneering work of M A Arbib R E Kalman G 1 Klir M D
