

Mental Health Peer Support

Though mental health distress is multi-dimensional, some signs are similar between conditions and/or individuals.

Mental health distress can also present more subtly depending on the individual - but subtle cues don't equate to less severity.

Use the "RELA" acronym to help you better recognize, approach, and support someone potentially battling with mental health.

R Recognize and familiarize yourself with the symptoms of mental illness.

E Empathize without competition by actively listening and validating your peer's experiences. Be mindful of your words, tone, and body language.

L Listen by hearing spoken words and noticing physical cues.

A Advocate for your peer's needs and for a greater need to focus on mental health in the community, academia, and professional settings.

How Can Education Better Support the Mental Health & Wellbeing of Young People? Contributions From Developmental Psychopathology & Educational Effectiveness Research James Elliot Hall, Jana Marinka Kreppner, 2019-11-27 How can education better support the mental health and wellbeing of young people? Research in the 1970s that addressed this question has since proven seminal to the development of two co-existing fields of research that continue to offer mutually informative insights: Developmental Psychopathology (DP) and Educational Effectiveness Research (EER). DP and EER share the common agenda of understanding factors that relate to individuals' learning and development. DP focuses on the individual learning and developing in context. EER investigates the educational systems, structures and processes that shape how individuals learn and develop. Given the complementarity of DP and EER, it is somewhat surprising that they have rarely joined forces and synthesised knowledge to develop a fuller understanding of the roles educational contexts play in the mental health and wellbeing of students. This Research Topic aims to stimulate such collaboration.
