mental representations unifies the otherwise divergent philosophical systems of Rationalists and Empiricists Thomas Reid battles against this thesis on many fronts in particular over the nature of perception Ryan Nichols lays the groundwork for Reid's theory of perception by developing Reid's unheralded argument against a representational theory of thought which Nichols applies to his discussion of the intentionality of perceptual states and Reid's appeal to signs Reid's efforts to preserve common sense epistemic commitments also lead him to adopt unique theories about our concepts of primary and secondary qualities and about original and acquired perceptions About the latter pair Nichols argues that most perceptual beliefs depend for their justification upon inferences The Way of Ideas holds that sensations are objects of awareness and that our senses are not robustly unified Nichols develops Reid's counter proposals by examining his discussion of the evolutionary purpose of sensations and the nature of our awareness of sensations as well as his intriguing affirmative answer to Molyneux's questions Nichols brings to the writing of this book a consummate knowledge of Reid's texts published and unpublished and a keen appreciation for Reid's responses to his predecessors He frequently reconstructs arguments in premise conclusion form thereby clarifying disputes that have frustrated previous Reid scholarship This clarification his lively examples and his plainspoken style make this book especially readable Reid's theory of perception is by far the most important feature of Reid's philosophical system and Nichols offers what will be for a long time to come the definitive analysis of this theory
