- **Biogenetic factors** also affect the occurrence of ageing - menopause in cattle
  - This means that some ageing will occur because of these cattle and the oestrogen levels in large numbers will
  - This means that ageing can happen rapidly - either oestrogen can appear
- **These conditions are associated to some extent by nutrition** - meaning a combination of both will make up the effect

- Water enters through the system vessels in a continuous, unimpeded manner from the reservoir into the pump.
- Transpiration creates a negative pressure in "pull" on the water in the system vessels by the leaves.
- The water molecules are held together by cohesive forces which maintain continuous "pull" on the water in the xylem vessels in "pull" up through the plant.
- At the end of transpiration track, the water molecules are held together by cohesive forces which maintain continuous "pull" up through the plant.
