

TITAN 701

700 Amps of Heavy-Duty Performance

Lincoln's New Titan 701 is both a rugged three cylinder diesel engine driven 700 amp DC arc welder and 3.4kW AC power generator. This robust diesel powered field welder has been designed and built specifically for demanding harsh environments and rugged work conditions like mining and construction sites, cross-country pipelines, civil engineering projects, fleets and on-site repair applications.

The design of the Titan 701 has especially taken into account the in-field maintenance requirements of remote locations. There are no PCB's used in the Titan 701 for low maintenance, long service life, easy operation and a great arc performance across all welding processes that this machine has been designed for.

The Titan 701 has been designed to meet specific customer requirements. Easy to understand controls, excellent welding characteristics for a wide variety of processes, in-field servicing especially when used in remote locations – NO electronics or PCB's, a heavy-duty design to ensure maximum reliability, powered by the Deutz F3L912 air-cooled engine.
