Integrating Computational and Neural Findings in Visual Object Perception Judith C. Peters, Hans P. Op de Beeck, Rainer Goebel, 2016-06-29 The articles in this Research Topic provide a state of the art overview of the current progress in integrating computational and empirical research on visual object recognition. Developments in this exciting multidisciplinary field have recently gained momentum. High performance computing enabled breakthroughs in computer vision and computational neuroscience. In parallel, innovative machine learning applications have recently become available for datamining the large scale high resolution brain data acquired with ultra high field fMRI and dense multi unit recordings. Finally, new techniques to integrate such rich simulated and empirical datasets for direct model testing could aid the development of a comprehensive brain model. We hope that this Research Topic contributes to these encouraging advances and inspires future research avenues in computational and empirical neuroscience.
