From publisher description: **The Giver**, 2011-03. *The M lodies of Francis Poulenc* Alissa Deeter, Robert Peavler, 2013-12-12. An acknowledged master of melody, Francis Poulenc's prolific song oeuvre exceeds the collections of all other French composers who wrote in this genre. Yet despite Poulenc's prolific output and its significance to art song repertoire, few volumes dedicated to study of Poulenc's works have appeared in print. This text offers a theory on the marginalized popularity of Poulenc's songs and strategies for their study that can assist performers in their appreciation and interpretation of his work. *The M lodies of Francis Poulenc* is the first work to contain the complete collection of Poulenc's song compositions, providing IPA transcriptions and word-for-word translations in an easy reference format. Also included are the highly regarded poetic translations of Winifred Radford. In their introduction to the songs, Deeter and Peavler formulate a methodology for the proper interpretation and study of the Poulenc's works. Finally, this work features a musical terms index, select discography of downloadable sound files, and a song title index. Teachers of singing, vocal coaches, professional singers, accompanists, and students of art song will find *The M lodies of Francis Poulenc* an invaluable tool for the study and instruction of Poulenc's songs. European Borderlands Elisabeth Boesen,Gregor Schnuer,2016-11-10 The expectations of European planners for the gradual disappearance of national borders and the corresponding prognoses of social scientists have turned out to be over optimistic Borders have not disappeared not even in a unified and predominantly peaceful Europe but rather they have changed become more varied and in a certain sense mobile taking on an important role in the everyday lives of more people than ever before Furthermore it is now widely accepted that borders do not just hinder communication and the formation of relationships but also channel and prefigure them in a positive way Presenting a number of studies of everyday life in European borderlands this book addresses the multifarious and complex ways in which borders function as both barriers and bridges Focusing on established Western European borderlands with the exception of three contrasting cases the book attempts a turn from conflict to harmony in the study of borderlands and thus examines the more mundane manifestations of border life and the complex often unconscious motives of everyday cross border practices The collection of chapters demonstrates that even in the case of open political borders the border remains an enduring factor that is not adequately described as either a problematic barrier or a desirable bridge The studies look at bordering processes not only approaching them from different disciplinary angles sociology anthropology geography history political science and literary studies but also choosing different scales and making comparisons that range from different borders of one country to the reactions and attitudes of different individuals in a single borderland village
