Anatomy of a Neuron

## Neuron Coloring Activity

**Introduction:** The diagram illustrates the structure of a neuron, the basic unit of the nervous system. Neurons are responsible for transmitting information throughout the body. They consist of a cell body (soma), dendrites, and an axon.

**Parts of a Neuron:**

- Dendrites:** These are branching structures that receive signals from other neurons or sensory input.
- Cell Body (Soma):** The central part of the neuron where the nucleus is located. It contains organelles and is responsible for processing information.
- Axon:** A long, thin projection that carries electrical impulses away from the cell body.
- Myelin Sheath:** A fatty layer that covers the axon, providing insulation and speeding up the transmission of signals.
- Axon Terminals:** The end of the axon where signals are passed to other neurons or muscles.

Label the parts of the neuron in the diagram below.

Write the name of each part in the space provided.

Write a short description of each part in the space provided.

Write the function of each part in the space provided.

Write the location of each part in the space provided.

Write the color of each part in the space provided.

Write the shape of each part in the space provided.

Write the size of each part in the space provided.
