Managing Aviation Projects from Concept to Completion Triant G. Flouris, Dennis Lock, 2016-02-22 Triant Flouris is a prominent academic and administrator in aviation management education Dennis Lock has more than forty years experience in practising lecturing and writing about project management When these two experts combined their considerable talents to write their earlier book *Aviation Project Management* it was little wonder that distinguished reviewers gave generous praise and acclaimed it as a welcome addition to what until then had been a neglected field That first title was structured as an essential primer for managers and students The authors have now written this more in depth book for managers and students who need to study aviation project management in much greater detail as well as critically connect project management within an aviation context to prudent business decision making Aviation project management is described in considerable detail throughout all stages of a lifecycle that begins when the project is only a vague concept and does not end until the project has been successfully completed fully documented and put into operational service Aviation projects have commonly failed to deliver their expected outcomes on time and have greatly exceeded their intended budgets Many of those failures would have been prevented if the project managers had adhered to the sound principles of project management as described and demonstrated throughout this book

Management Research Susan Rose, Nigel Spinks, Ana Isabel Canhoto, 2014-07-25 For many post graduate students undertaking a research project for the first time is a daunting prospect Gaining the knowledge and skills needed to do research typically has to be done alongside carrying out the project itself Students often have to conduct their research independently perhaps with limited tutor contact What is needed in such situations is a resource that supports the new researcher on every step of the research journey from defining the project to communicating its findings *Management Research Applying the Principles* provides just such a resource Structured around the key stages of a research project it is designed to provide answers to the questions faced by new researchers but without neglecting the underlying principles of good research Each chapter includes next steps activities to help readers apply the content to their own live research project The companion website provides extensive resources including video tutorials to support the development of practical research skills The text reflects the richness and variety of current business and management research both in its presentation of methods and techniques and its choice of examples drawn from different subject disciplines industries and organizations *Management Research Applying the Principles* combines diversity of coverage with a singularity of purpose to help students complete their research project to a rigorous standard

Toward a General Theory of Expertise K. Anders Ericsson, Jacqui Smith, 1991-08-30 During the last twenty years our understanding of expertise has dramatically increased Laboratory analysis of chess masters experts in physics and medicine musicians athletics writers and performance artists have included careful examination of the cognitive processes mediating outstanding performance in very diverse areas of expertise These analyses have shown that expert performance is primarily a reflection

of acquired skill resulting from the accumulation of domain specific knowledge and methods during many years of training practice The importance of domain specific knowledge has led researchers on expertise to focus on characteristics of expertise in specific domains In *Toward a General Theory of Expertise* many of the world's foremost scientists review the state of the art knowledge about expertise in different domains with the goal of identifying characteristics of expert performance that are generalizable across many different areas of expertise These essays provide a comprehensive summary of general methods for studying expertise and of current knowledge about expertise in chess physics medicine sports and performance arts music writing and decision making Most important the essays reveal the existence of many general characteristics of expertise
