Visualizing History's Fragments Ashley R. Sanders, 2024-06-19 This book combines a methodological guide with an extended case study to show how digital research methods can be used to explore how ethnicity gender and kinship shaped early modern Algerian society and politics However the approaches presented have applications far beyond this specific study More broadly these methods are relevant for those interested in identifying and studying relational data demographics politics discourse authorial bias and social networks of both known and unnamed actors Ashley R Sanders explores how digital research methods can be used to study archival specters people who lived breathed and made their mark on history but whose

presence in the archives and extant documents remains limited at best if not altogether lost Although digital tools cannot metaphorically resurrect the dead nor fill archival gaps they can help us excavate the people shaped outlines of those who might have filled these spaces The six methodological chapters explain why and how each research method is used present the visual and quantitative results and analyze them within the context of the historical case study In addition every dataset is available on SpringerLink as Electronic Supplementary Material ESM and each chapter is accompanied by one or more video tutorials that demonstrate how to apply each of the techniques described accessed via the SN More Media App
