

InSync® I Installation Instructions

All parts needed to install the InSync® I lock are included with each unit. Check to make sure all parts are accounted for before beginning installation. Do not substitute any of the parts. The use of substitute parts will result in poor performance of the lock.

1. Prepare the door using the InSync I installation template.
2. Prepare the door frame using the template and install the strike plates using the screws provided.
3. Install the dead bolt and latch bolt in the door edge and fasten them to the door with the screws provided (see Fig. 3).
4. Determine the hand of the door (see Fig. 1). With the dead bolt extended, properly orient the tailpiece (see Fig. 2). Install the upper outside trim, keeping the battery wire above the dead bolt. Feed the tailpiece through the dead bolt hub and hold the trim against door.

Important: Rotate the tailpiece and retract dead bolt to confirm proper alignment with the door frame.

5. Before installing the inner trim, rotate the lever to insure that the tailpiece cam is in the correct orientation (see Fig. 3, Detail "A"). Verify that the dead bolt is retracted and the upper outside trim is in place. While placing the inner trim in position, feed the wire harness through the appropriate hole in the inner chassis and attach it with the two 1/4-20 machine screws.
