Everyday Lifestyles and Sustainability Fabricio Chicca, Brenda Vale, Robert Vale, 2018-04-09 The impact of humanity on the earth overshoots the earth's bio capacity to supply humanity's needs meaning that people are living off earth's capital rather than its income However not all countries are equal and this book explores why apparently similar patterns of daily living can lead to larger and smaller environmental impacts The contributors describe daily life in many different places in the world and then calculate the environmental impact of these ways of living from the perspective of ecological and carbon footprints This leads to comparison and discussion of what living within the limits of the planet might mean Current footprints for countries are derived from national statistics and these hide the variety of impacts made

by individual people and the choices they make in their daily lives This book takes a bottom up approach by calculating the footprints of daily living The purpose is to show that small changes in behaviour now could avoid some very challenging problems in the future Offering a global perspective on the question of sustainable living this book will be of great interest to anyone with a concern for the future as well as students and researchers in environmental studies human geography and development studies **The Innovation Odyssey** Christophe Midler, Marc Alochet, Christophe De Charentenay, 2023-04-21

Affordable is not typically the first adjective used to describe an electric automobile This book traces the history of an affordable electric car from its genesis to its marketing This history is more than a singular adventure It is the analysis of a project that allows us to understand the key issues of strategy and management of contemporary innovation The book features in lessons in Strategy revealing the complexity of international product development and the conditions for its implementation in today's fragmented world Project management showing what is required to succeed in the a priori impossible challenge of a design within an alliance between five partners from four different countries Innovation demonstrating that the electrification of mobility can be combined with affordable prices Industrial policy using the emblematic domain of electric vehicles to illustrate the major role of public authorities in technology the future direction of this role and the importance in the competition between Western and Chinese industries Intrapreneurship showing that a start up is not the only context in which it is possible to attempt and experience breakthroughs *Living and Working With Snow, Ice and Seasons in the Modern Arctic* Hannah Strauss-Mazzullo, Monica Tennberg, 2023-08-31 This book describes everyday practices of life in changing Arctic winter conditions The authors explore the contemporary and situated outdoor practices in different work settings in Finnish Lapland and investigate how for example tourism reindeer herding cattle breeding and urban snow management adapt to the physically limiting or enabling features of cold temperatures snow and ice The book also highlights individual and societal adjustments to such harsh conditions and their seasonal changes in mobility including winter cycling use of snow mobiles and walking with studded shoes The impact of a warming climate is a great concern for those utilising the enabling qualities of winter weather The need then for continuous adaptation in everyday practices of work and mobility will increase in the future Quattroruote No12/2014 ИД «Бурда», 2014-12-02
