Air Pollution in the 21st Century T. Schneider, 1999-03-12 This symposium was jointly organized by the United States Environmental Protection Agency and The Netherlands Ministry of Housing Spatial Planning and the Environment These proceedings will provide a stimulus for taking up the challenges of environmental policy development in the 21st century and will contribute to continuing co operation Clean air is a basic condition for health Air pollution aggravates respiratory problems leading to increased sickness absenteeism increased use of health care services and even premature mortality Air pollution is under intensive discussion in the United States and Europe In The Netherlands a wide range of policy instruments have been formulated which have reduced air pollution For example since 1975 sulphur dioxide and lead emissions have been reduced However emission reduction figures for many other substances are more modest Many air pollution problems persist because progress in countering these problems is nullified by growth in the economy and traffic Another important target is the prevention of climate change The international community is agreed that the increasing concentration of greenhouse gases in the atmosphere has led to a gradual increase in the earth's temperature In terms of the environmental consequences and social implications the greenhouse problem surpasses all other air quality problems Across Europe strategies are being developed to reduce acidification and photochemical air pollution An air emission ceiling for each country in the European Union is being agreed In the area of climate change there is good co operation between the United States The Netherlands and other EU Members States in the ongoing global negotiations This is the start of a new movement In the last century economies and societies developed through increasing human productivity In the next century they must develop through increasing the productivity of fuel and natural resources

The Cambridge Companion to Blues and Gospel Music Allan Moore, 2003-03-13 From Robert Johnson to Aretha Franklin Mahalia Jackson to John Lee Hooker blues and gospel artists figure heavily in the mythology of twentieth century culture The styles in which they sang have proved hugely influential to generations of popular singers from the

wholesale adoptions of singers like Robert Cray or James Brown to the subtler vocal appropriations of Mariah Carey Their own music and how it operates is not however always seen as valid in its own right This book provides an overview of both these genres which worked together to provide an expression of twentieth century black US experience Their histories are unfolded and questioned representative songs and lyrical imagery are analysed perspectives are offered from the standpoint of the voice the guitar the piano and also that of the working musician The book concludes with a discussion of the impact the genres have had on mainstream musical culture *Sound and Safe* Karin Bijsterveld, Eefje Cleophas, Stefan Krebs, Gijs Mom, 2014 This book traces the full history of noise in and around cars shows how we created auditory privacy in our cars even though they were highly noisy things at the beginning of the twentieth century It is about the sounds of car engines tires wipers blinkers warning signals in car audio systems and ultimately about how we became used to listen while driving

Isolde Ahlgrimm, Vienna and the Early Music Revival Peter Watchorn, 2017-07-05 Isolde Ahlgrimm 1914 1995 was an important pioneer in the revival of Baroque and Classical keyboard instruments in her native city Vienna and later throughout Europe and the United States She trained as a pianist at the Musikakademie in Vienna under the instruction of Viktor Ebenstein Emil von Sauer and Franz Schmidt In 1934 she met the musical instrument collector Dr Erich Fiala whom she married in 1938 His activities opened up the world of early instruments to her Using a 1790 fortepiano by Michael Rosenberger Isolde Ahlgrimm began her career as a specialist on early keyboard instruments with the first in her notable series of *Concerte für Kenner und Liebhaber* given in Vienna's Palais Palffy in February 1937 Ahlgrimm's career as a harpsichordist also began in 1937 when a new instrument was commissioned from the Ammer brothers in Eisenberg Germany In 1943 Ahlgrimm performed her first all harpsichord programme which consisted of the Goldberg Variations by J S Bach From 1949 to 1956 she devoted herself to performing and recording nearly all of Bach's harpsichord music for the newly founded Dutch label Philips presenting her new approach to the harpsichord to a wider audience Ahlgrimm's performances of Baroque music represented a radical departure from the distinctly twentieth century interpretations by the much more famous Wanda Landowska and her followers Most obviously Ahlgrimm's harpsichord performances eliminated frequent registration changes her instrument had hand stops rather than pedals to change registers and largely eschewed the massive ritardandi and other anachronistic performance practices that were hallmarks of Landowska's essentially Romantic style Ahlgrimm researched and emphasized rhetorical traditions on which the music was based This became more pronounced throughout the course of her later performing writing and teaching career and it was the beginning of an approach to the performance of eighteenth century music **Sound & Hearing** R. Duncan Luce, 2013-05-13 The major aim of this book is to introduce the ways in which scientists approach and think about a phenomenon hearing that intersects three quite different disciplines the physics of sound sources and the propagation of sound through air and other materials the anatomy and physiology of the transformation of the physical sound into neural activity in the brain and the psychology of

the perception we call hearing Physics biology and psychology each play a role in understanding how and what we hear The text evolved over the past decade in an attempt to convey something about scientific thinking as evidenced in the domain of sounds and their perception to students whose primary focus is not science It does so using a minimum of mathematics high school functions such as linear logarithmic sine and power without compromising scientific integrity A significant enrichment is the availability of a compact disc CD containing over 20 examples of acoustic demonstrations referred to in the book These demonstrations which range from echo effects and filtered noise to categorical speech perception and total more than 45 minutes are invaluable resources for making the text come alive *Catalog of Sound Recordings* Sibley Music Library,1977
