## **Physical Activity Guidelines For Americans Midcourse Report:**

**Physical Activity Guidelines for American Midcourse Report** U.s. Department of Health and Services,2014-05-27 In response to a desire from both federal and non federal stakeholders for the 2008 Physical Activity Guidelines for Americans to be updated on a regular basis the U S Department of Health and Human Services HHS Office of Disease Prevention and Health Promotion ODPHP the President s Council on Fitness Sports Nutrition PCFSN the Centers for Disease Control and Prevention CDC and the National Institutes of Health NIH formed a federal steering group to discuss this issue Although research and new findings in the realm of physical activity continue to emerge the group believed that the current Physical Activity Guidelines for Americans recommendations would change little if they were updated Therefore the steering group recommended a Midcourse Report which would provide an opportunity for experts to review and highlight a specific topic of importance related to the Guidelines and to communicate findings to the public The steering group identified strategies to increase physical activity among youth as a topic area that would help to inform current practice related to the Guidelines

*Advancing Obesity Solutions Through Investments in the Built Environment* National Academies of Sciences, Engineering, and Medicine,Health and Medicine Division,Food and Nutrition Board,Roundtable on Obesity Solutions,2018-06-14 The built environment the physical world made up of the homes buildings streets and infrastructure within which people live work and play underwent changes during the 20th and 21st centuries that contributed to a sharp decline in physical activity and affected access to healthy foods Those developments contributed in turn to the weight gain observed among Americans in recent decades Many believe therefore that policies and practices that affect the built environment could affect obesity rates in the United States and improve the health of Americans The National Academies of Sciences Engineering and Medicine convened a workshop in September 2017 to improve understanding of the roles played by the built environment in the prevention and treatment of obesity and to identify promising strategies in multiple sectors that can be scaled up to create more healthful and equitable environments This publication summarizes the presentations and discussions from the workshop

Physical Activity and Public Health Practice Daniel B. Bornstein,Daniel Benjamin Bornstein,Amy A. Eyler,Jay E. Maddock,Justin B. Moore,2019-01-28 Physical Activity in Public Health Practice provides the first evidence based practical textbook to guide readers through the process of conceptualizing justifying implementing and evaluating physical activity interventions across a broad array of settings and populations Section One begins with an overview of epidemiology measurement critical milestones and the importance of moving beyond individual level physical activity intervention to interventions aimed at policy systems and environmental level changes Section Two considers planning interventions across a variety of settings and populations including general concepts for implementation and evaluation how to build effective coalitions steps for developing community regional or state level strategic plans and effectively translating policy into practice Section Three addresses how to implement physical activity strategies across a variety of settings including worksites faith based settings healthcare settings schools and parks and recreation This section also provides guidance on the complexities and challenges of targeting interventions for specific populations such as families

older adults persons with disabilities as well as different strategies for urban and rural populations Lastly Section Four outlines effective strategies for how to evaluate interventions depending upon impact outcome and cost evaluation and dissemination models for your intervention Presented from both a research and a practice perspective while discussing the best available research this book provides the basis for planning and implementing physical activity programs that work and can build healthier communities This hands on text incorporates learning objectives real world examples case studies and bulleted lists whenever possible so that the content can be digested easily not only in undergraduate and graduate course settings but also by public health workers and other health educators in practice Written by world experts and augmented by practical applications this textbook prepares public health students and practitioners to develop effective interventions and spur greater physical activity in their communities Key Features Provides effective strategies for properly measuring and increasing physical activity in communities Demonstrates how to carry out physical activity interventions across a variety of settings including schools communities worksites and many more Discusses methods for directing physical activity interventions to specific populations Delivers strategies for building successful partnerships and coalitions Practical group activities exercises discussion questions audio podcast discussions and a full instructor packet accompany the textbook
