Wimmer,Ameneh Deljoo,2015-06-03 The explosive growth in data computational power and social media creates new opportunities for innovating the processes and solutions of Information and communications technology ICT based policy making and research To take advantage of these developments in the digital world new approaches concepts instruments and methods are needed to navigate the societal and computational complexity This requires extensive interdisciplinary knowledge of public administration policy analyses information systems complex systems and computer science This book provides the foundation for this new interdisciplinary field in which various traditional disciplines are blending Both policy makers executors and those in charge of policy implementations acknowledge that ICT is becoming more important and is changing the policy making process resulting in a next generation policy making based on ICT support Web 2 0 and even Web 3 0 point to the specific applications of social networks semantically enriched and linked data whereas policy making has also to do with the use of the vast amount of data predictions and forecasts and improving the outcomes of policy making which is confronted with an increasing complexity and uncertainty of the outcomes The field of policy making is changing and driven by developments like open data computational methods for processing data opining mining simulation and visualization of rich data sets all combined with public engagement social media and participatory tools   **Mobile Technologies in the Ancient Sahara and Beyond** C. N. Duckworth,A. Cuénod,D. J. Mattingly,2020-09-03 Examines key technological innovations knowledge transfer connectivity and social meaning in the ancient and Medieval Sahara   The Social World after COVID-19 Paulo Alexandre e Castro,2022-11-09 This collection discusses different aspects of the COVID 19 pandemic which began in December 2019 in Wuhan China brought together under the slogan of social worlds It is a book dedicated to thinking a posteriori about the implications and consequences of the pandemic bearing in mind that it was a challenge political social economic and philosophical that tested the limits of human nature and the condition of humans in a world whose logic seems to slip away In this sense this volume brings together different approaches to this topic ranging from philosophy to sociology and from politics to social work thus constituting an original work on such a delicate issue   The Magic of Technology Alf Hornborg,2022-10-20 This book examines our understanding of technology and suggests that machines are counterfeit organisms that seem to replace human bodies but are ultimately means of displacing workloads and environmental loads beyond our horizon It emphasises that technology is not the politically neutral revelation of natural principles that we tend to think but largely a means of accumulating through physically asymmetric exchange the material means of harnessing natural forces to reinforce social relations of power Alf Hornborg reflects on how our cultural illusions about technology appeared in history and how they continue to stand in the way of visions for an equal and sustainable world He argues for a critical reconceptualisation of modern technology as an institution for redistributing

human time resources and risks in world society The book highlights a need to think of world trade in other terms than money and raises fundamental questions about the role of human artifact relations in organising human societies It will be of interest to a range of scholars working in anthropology sociology economics development studies and the philosophy of technology CHOICE Outstanding Academic Title for 2023 **Handbook of Teaching with Technology in Management, Leadership, and Business** Stuart Allen,Kim Gower,Danielle K. Allen,2020-09-25 Ever evolving technological innovation creates both opportunities and challenges for educators aiming to achieve meaningful and effective learning in the classroom and to equip students with a well honed set of technology skills as they enter the professional world The Handbook of Teaching with Technology in Management Leadership and Business is written by experienced instructors using technology in novel and impactful ways in their undergraduate and graduate courses as well as researchers reporting and reflecting on studies and literature that can guide them on the how and why of teaching with technology **Precision-guided Munitions and Human Suffering in War** James E. Hickey,2016-04-08 James Hickey proceeds from the premise that throughout history humans have demonstrated a proclivity for using violence against one another as a means to achieve an end means enabled in many respects by the technologies available at the time Advancing technology has often been a prime enabler of ever increasing levels of violence and attendant human suffering At a few junctures in history however certain technologies have seemingly provided the armed forces that possess them the ability to fight wars with decreasing levels of violence and suffering Today precision guided munitions PGMs with their high degree of discrimination and accuracy again hold such promise This book seeks to answer the question Do PGMs mitigate suffering in war and have these weapons changed the way decisions regarding war and peace have been made Answering this question helps us understand possible shifts in emphasis in modern warfare both in terms of methods employed and of the greater concern placed on limiting human suffering during conflict This book will help students of ethics just war and military history and senior military and civilian leaders to understand the possible outcomes and wider implications of their strategic choices to use such technology **Kierkegaard and the Question Concerning Technology** Christopher B. Barnett,2019-08-22 Over the last several decades technology has emerged as an important area of interest for both philosophers and theologians Yet despite his status as one of modernity s seminal thinkers S ren Kierkegaard is not often seen as one who contributed to the field Kierkegaard and the Question Concerning Technology argues otherwise Christopher B Barnett shows that many of Kierkegaard s criticisms of the present age relate to the increasing dominance of technology in the West and he puts Kierkegaard s thought in conversation with subsequent thinkers who grappled with technological issues from Martin Heidegger to Thomas Merton Barnett shows that Kierkegaard s writing with its marked emphases on personal upbuilding stands as a place where deeper non technical modes of thinking are both commended and nurtured In doing so Barnett presents a Kierkegaard who remains relevant perhaps all too relevant in today s digital age **Design in Educational Technology** Brad Hokanson,Andrew

Gibbons,2013-09-07 This book is the result of a research symposium sponsored by the Association for Educational Communications and Technology AECT The fifteen chapters were developed by leaders in the field and represent the most updated and cutting edge methodology in the areas of instructional design and instructional technology The broad concepts of design design thinking the design process and the design studio are identified and they form the framework of the book This book advocates the conscious adoption of a mindset of design thinking such as that evident in a range of divergent professions including business government and medicine At its core is a focus on planning inventing making and doing Cross 1982 all of which are of value to the field of educational technology Additionally the book endeavors to develop a deep understanding of the design process in the reader It is a critical skill often drawing from other traditional design fields An examination of the design process as practiced of new models for design and of ways to connect theory to the development of educational products are all fully explored with the goal of providing guidance for emerging instructional designers and deepening the practice of more advanced practitioners Finally as a large number of leading schools of instructional design have adopted the studio form of education for their professional programs we include this emerging topic in the book as a practical and focused guide for readers at all levels   **Catastrophic Technology in Cold War Political Thought** Caroline Ashcroft,2024-11-30 In the mid twentieth century a certain idea of technology emerged in the work of many influential political theorists a critical catastrophic concept of technology entangled with the apocalyptic fears fuelled by two all consuming world wars and the looming nuclear threat Drawing on the work of theorists such as Hannah Arendt Jacques Ellul Martin Heidegger and Herbert Marcuse Catastrophic Technology in Cold War Political Thought explores the critical idea of technology as both a response to a dramatically changing world and a radical political critique of Cold War liberalism   **Postphenomenology** Evan Selinger,2012-02-01 Postphenomenology is the first book devoted exclusively to the interpretation and advancement of prominent phenomenologist Don Ihde s landmark contributions to history philosophy sociology science sound studies and technology studies Ihde has made a direct and lasting impact on the study of technological experience across the disciplines and acquired an international following of diverse scholars along the way many of whom contribute to Postphenomenology including Albert Borgmann who characterizes Ihde as being among the most interesting and provocative contemporary American philosophers The contributors situate assess and apply Ihde s philosophy with respect to the primary themes that his oeuvre emphasizes They not only clarify Ihde s work but also make significant contributions to the philosophy of technology phenomenology hermeneutics and the philosophy of science A comprehensive response from Ihde concludes the volume   *Cultures of Technology and the Quest for Innovation* Helga Nowotny,2006-02-01 Underlying the current dynamics of technological developments their divergence or convergence and the abundance of options promises and risks they contain is the quest for innovation the contributors to this volume argue The seemingly insatiable demand for novelty coincides with the rise of modern science and the onset of modernity in Western

societies Never before has the Baconian dream been so close to becoming reality wrapped into a globalizing capitalism that seeks ever expanding markets for new products artifacts and designs and new processes that lead to gains in efficiency productivity and profit However approaching these developments through a wider historical and cultural perspectives means to raise questions about the plurality of cultures the interaction between hardware and software and about the nature of the interfaces where technology meets with economic social legal historical constraints and opportunities The authors come to the conclusion that inside a seemingly homogenous package and a seemingly universal quest for innovation many differences remain *Heidegger and Development in the Global South* Siby K. George,2015-03-05 Taking the Heideggerian critical ontology of technology as its base this volume looks at postcolonial modernization and development in the global south as the worldwide expansion of the western metaphysical understanding of reality We live today in an increasingly globalizing technological society that Martin Heidegger described in the middle of the last century as the planetary imperialism of technologically organized man Consequent upon this cultural intellectual globalization the ahistorical violent individualistic calculative and capitalistic logic of the metaphysics of technology is permeating the life world even of the world s poorest peoples in ways they could neither choose nor control This volume questions the political ethics and justice of post war development discourse in the light of the egalitarian aims of modern societies cultural freedom of communities and nations and the ecological limits of the planet The final chapters discuss the alternative proposal of development as various conceptions of good life and equitable human flourishing amidst equally flourishing non human life and non living beings This unique volume is the first book length treatment of the ontology of modernization and development in the global south from a Heideggerian stance **Pedagogy for Technology Education in Secondary Schools** P. John Williams,David Barlex,2020-05-21 This book explores pedagogy appropriate for the secondary school technology education classroom It covers the dimensions of pedagogy for technology with scholarly research including information strongly related to practice The book discusses the nature of technology courses in secondary schools across various jurisdictions and considers how they might be viewed with regard to different epistemological frameworks The writing is informed by but not limited to research and strongly related to practice with acknowledged experts in the field of technology education contributing chapters supported by evidence from technology education research or other fields The authors speculate on pedagogical possibilities in their areas of expertise in order to consider pedagogical possibilities and develop a view of where pedagogy for technology education should move and how teachers might respond in the way they develop their practice **Printed Physics** Ludger Hovestadt,Vera Bühlmann,2012-12-08 Edited by Ludger Hovestadt and Vera B hlmann Applied Virtuality is a book series which is edited by Ludger Hovestadt ITA Institute of Technology in Architecture ETH Z rich Switzerland and Vera B hlmann Technical University Vienna Institute for Architectural Theory Based on the thesis that technology changes character over time the series aims and scopes are to reflect that change by describing and analyzing the most recent

explorations and innovations in technology as well as their implications for a more philosophically comprehensive understanding of technics in our contemporary symbolical information saturated climatic environments The overall interest thereby is to 1 affirm the mightiness of the generic without embracing homogeneity as a necessary consequence 2 to affirm calculation computation and automatization without embracing the reduction of human intellect to mechanisation without arcane sprit and 3 to oppose in principle the contemporary attitude that tends towards a certain intellectual chicness that seems to rather narcissistically celebrate itself in a strangely detached competition for critical divination of soon to be expected cultural doom and decay With the birth of abstract symbolic universal algebra in the late 19th century many scholars associate a fundamental crisis that affects human culture at large We owe all of our contemporary electric and information based infrastructures for living to these developments in mathematics and it is no coincidence that we tend to find the symptoms that point to the manifestation of this crisis in the changes this new form of technics imposes on the people who begin to rely on it This crisis is classically conceived as a crisis of intuition Hans Hahn Edmund Husserl et cetera But from a more appreciative stance towards the sheer unlikeliness and fantastic power of intellection which is at work everywhere in the reality of such media ized living environments we might just as well see in this characterization an anxious even if all too understandable misconception of the critical developments we are experiencing From this stance the sheer prominence of this misconception today indicates what appears like a certain fatigue of thinking perhaps an exhaustion through overwhelming of our collective power to imagine We mean no offence by saying this Let us illustrate more concretely John Orton maintains in his book Semiconductors and the Information Revolution Magic Crystals That Made IT Happen that as a human achievement semiconductors ought to rank alongside the Beethoven Symphonies Concord Impressionism medieval cathedrals and Burgundy wines and we should be equally proud of it 2009 p 2 Why is it indeed that this demand feels odd Of course this lack of appreciating our current form of technics is owed partially to its abstractness and the degree of expertise it seems to demand from us But has this not been the case for any of the abovementioned artifacts we all meanwhile hold as precious and dear We hope to find the right dosage of irony and humor that seems so necessary for theorizing technics arts intellection in a manner that seeks to escape 1 the servile irresponsibility that attaches to programs of mechanization as well as 2 the narrow mindedness and missionary commitment that attaches to ideological doctrine and programmatic By celebrating moments of intellectual quickness with our interest in theory and abstraction we pursue a genuinely comparatistic approach We regard artifacts as theoretical objects constituted by the intelligible codes and symbolic grammaticality that give them consistency But we don t see the reality of artifacts in the white spectrum of these codes and symbols rather we see their reality in that which is enciphered thereby The ambitions of a comparatistic approach to theory strive towards an alphabetization and literacy of these codes   **Technocrats of the Imagination** John Beck,Ryan Bishop,2020-03-13 John Beck and Ryan Bishop explore the 1960s interdisciplinary art and technology
