## Photosynthesis, Student Learning Guide (AP Bio)

### Getting started:

- Go to [learn-biology.com](http://learn-biology.com). Use the menu from your course to find "Photosynthesis"
- If you're submitting this electronically to your instructor, please type your answers in **blue**, **red**, or any other color your instructor suggests.
- As you go, click on ☐ to change it to a ☒

### Tutorial 1: Introduction

- ☐ 1. Complete the Interactive Diagram, "Photosynthesis Inputs and Outputs," and read the text below the diagram.
- ☐ 2. Read "Photosynthesis is an endergonic redox reaction."
- ☐ 3. Take the quiz "Photosynthesis: the Big Picture."

**SUMMARIZING:** Use the diagram below to write a summary of this section. Don't just write a key; also connect what's below to concepts like entropy, carbon fixation, oxidation, and reduction.

### Continue to Tutorial 2: The Two Phases of Photosynthesis

1. Read the "Introduction." What's the connection between endosymbiosis and photosynthesis?

- ☐ 2. Read "Leaves."
- ☐ 3. Read "Chloroplasts"
- ☐ 4. Read about how "...Photosynthesis occurs in two Phases."
- 5. Take the Quiz: "The Two Phases of Photosynthesis."

### Checking Understanding

Describe the two phases of photosynthesis

**Making Connections.** In the space below, list the inputs of photosynthesis, and describe where they come in. Then list the outputs, and describe where they come out.

Inputs:

Outputs:

Now list a few ways that the structure of a leaf is adapted to its function.

**Developing Assessments for the Next Generation Science Standards** National Research Council,Division of Behavioral and Social Sciences and Education,Board on Science Education,Board on Testing and Assessment,Committee on Developing Assessments of Science Proficiency in K-12,2014-05-29 Assessments understood as tools for tracking what and how well students have learned play a critical role in the classroom Developing Assessments for the Next Generation Science Standards develops an approach to science assessment to meet the vision of science education for the future as it has been elaborated in A Framework for K 12 Science Education Framework and Next Generation Science Standards NGSS These documents are brand new and the changes they call for are barely under way but the new assessments will be needed as soon as states and districts begin the process of

implementing the NGSS and changing their approach to science education The new Framework and the NGSS are designed to guide educators in significantly altering the way K 12 science is taught The Framework is aimed at making science education more closely resemble the way scientists actually work and think and making instruction reflect research on learning that demonstrates the importance of building coherent understandings over time It structures science education around three dimensions the practices through which scientists and engineers do their work the key crosscutting concepts that cut across disciplines and the core ideas of the disciplines and argues that they should be interwoven in every aspect of science education building in sophistication as students progress through grades K 12 Developing Assessments for the Next Generation Science Standards recommends strategies for developing assessments that yield valid measures of student proficiency in science as described in the new Framework This report reviews recent and current work in science assessment to determine which aspects of the Framework s vision can be assessed with available techniques and what additional research and development will be needed to support an assessment system that fully meets that vision The report offers a systems approach to science assessment in which a range of assessment strategies are designed to answer different kinds of questions with appropriate degrees of specificity and provide results that complement one another Developing Assessments for the Next Generation Science Standards makes the case that a science assessment system that meets the Framework s vision should consist of assessments designed to support classroom instruction assessments designed to monitor science learning on a broader scale and indicators designed to track opportunity to learn New standards for science education make clear that new modes of assessment designed to measure the integrated learning they promote are essential The recommendations of this report will be key to making sure that the dramatic changes in curriculum and instruction signaled by Framework and the NGSS reduce inequities in science education and raise the level of science education for all students
