Playwork in Practice Ali Wood, Julia Sexton, Jacky Kilvington, 2024-09-05 Playwork in Practice introduces the ways that playwork can be used across the children's workforce including carers, qualified teachers, parents and other adults. You will learn the theoretical and practical aspects of the playwork approach supported by a wealth of research evidence. This book is for anyone studying playwork or looking to use it in their own practice. The chapters focus on the following areas where the playwork approach can be applied: behaviour, adult expectations, relationships and inclusion, space, environment and outdoors, age, risk and resilience, emotions and resilience, health, well-being and gender. Using a reflexive, reflective approach, the book offers vivid descriptions of interactions between children and adults in a range of different circumstances and analyses these interactions critically. Each chapter includes a real life story with analysis based on the authors' conversations with carers, playworkers, parents and other adults. The chapters also include reflective questions.

Law, Policy, and Practice on China's Periphery Pitman B. Potter, 2010-09-13 This book examines the Chinese government's policies and practices for relations with the Inner Periphery areas of Tibet, Xinjiang and Inner Mongolia and the Outer Periphery areas of Hong Kong and Taiwan, focusing on themes of political authority, socio-cultural relations and economic development. China's history may be seen as one of managing the geographic periphery surrounding China proper. Successive imperial, republican and communist governments have struggled to maintain sovereignty over the regions surrounding the great river valleys of China. The importance of the periphery is no less real today; concerns over national security, access to natural resources and long-held concerns about relations between Han and other ethnic groups continue to dominate.

Chinese law policy and practice regarding governance in the Inner Periphery regions of Inner Mongolia Xinjiang and Tibet In the Outer Periphery Beijing sees engagement with the outside world particularly the West as inextricably tied to Chinese sovereignty over former foreign colonies of Hong Kong and Taiwan Using the case study of national integration to indicate how policies are articulated and implemented through law and political legal institutions this book will be of interest to students and scholars of the peripheral regions It will also appeal to academic and policy communities interested in legal reform in China Reconstructing Response to Student Writing Dan Melzer,2023-08-07 In *Reconstructing Response to Student Writing* Dan Melzer makes the argument that writing instructors should shift the construct so that peer response and student self assessment are more central than teacher response Presenting the results of a national study of teacher and peer response and student self assessment at institutions of higher education across the United States Melzer analyzes teacher and peer response to over 1 000 pieces of student writing as well as 128 student portfolio reflection essays He draws on his analysis and on a comprehensive review of the literature on response to introduce a constructivist heuristic for response aimed at both composition instructors and instructors across disciplines Melzer argues that teachers and researchers should focus less on teacher response to individual pieces of student writing and more on engaging in dialogue with student self assessment and peer response focusing on growth and transfer rather than products and grades *Reconstructing Response to Student Writing* especially when taken together with Melzer's previous book *Assignments across the Curriculum* provides a comprehensive and large scale view of college writing and responding across the curriculum in the United States **Geek Sublime** Vikram Chandra,2014-09-02 The nonfiction debut from the author of the international bestseller *Sacred Games* about the surprising overlap between writing and computer coding Vikram Chandra has been a computer programmer for almost as long as he has been a novelist In this extraordinary new book his first work of nonfiction he searches for the connections between the worlds of art and technology Coders are obsessed with elegance and style just as writers are but do the words mean the same thing to both Can we ascribe beauty to the craft of writing code Exploring such varied topics as logic gates and literary modernism the machismo of tech geeks the omnipresence of an Indian Mafia in Silicon Valley and the writings of the eleventh century Kashmiri thinker Abhinavagupta *Geek Sublime* is both an idiosyncratic history of coding and a fascinating meditation on the writer's art Part literary essay part technology story and part memoir it is an engrossing original and heady book of sweeping ideas *What About Us?* Edgar D. Johnson,2010-12-01 Over the past three decades the standards based reform movement has transformed K 12 education in the United States culminating with passage of the No Child Left Behind Act in 2002 Beyond making reasonable accommodations for special needs students standards based education pays little attention to other areas of student difference relying instead on a rational actor model of student experience and ignoring how differences in students backgrounds and orientations impact their particular experiences of schooling This book examines the development of standards based education with particular scrutiny of the

roles of the National Governors Association and its National Education Summit events Examination of important documents emerging from those events provides an illustration of the conceptually impoverished understanding of student subjectivity motivation and agency inherent in standards based education In order to understand both problems with and alternatives to standards based education the author examines the roles of ideology rhetoric and audience in school policy In three case studies the author analyzes several non school models of education including Marine Corps bootcamp Ving Tsun kung fu training and an online school resistance community Johnson argues that examination of these learning contexts provides a better understanding of the shortcomings and dangers of the standards based model of student subjectivity and suggests a set of fourteen principles to inform the development of more student centered alternatives
