

# The Entire Function of the Pineal Gland

With the latin word Pinea, which means for pine cone, it was first described by the Greek philosopher Galen as glandula pinealis

Later, René Descartes described it as a unique meeting point between body and soul where all 'thoughts are formed'

The main function is known as an endocrine gland to release the sleep hormone melatonin. In darkness, the pineal gland converts the neurotransmitter serotonin to melatonin to control the circadian rhythm of the body

Now it's also been found to affect weight gain, fertility, and even tumour suppression. It's even a global antioxidant released from the digestive system for anti-inflammatory purposes

The pineal gland sits above the hypothalamus and signals the pituitary gland to release all of our daytime hormones

The pineal gland also uses another molecule called Dithymethyl Tryptomine. DMT is like serotonin. But, it uniquely crosses the special blood brain barrier that gives it access to the pineal gland

Trials have shown that DMT given to patients can alter their state of consciousness in a similar way

Ancient ceremonies like Yoga, meditation, and mindfulness focus on activating the Pineal gland in humans
