Hallett, 2000-05-25 Charting a middle way between the extremes represented by Alvin Plantinga and Richard Swinburne Garth Hallett explores the thesis that if belief in other minds is rational and true as it surely is so too is belief in God He makes a strong case that when this parity claim is appropriately restricted to a single sound other minds belief belief in God and belief in other minds do prove epistemically comparable This result and the distinctive path that leads to it will interest students and scholars in philosophy of religion and theology *Ethical Issues: Perspectives for Canadians - Fourth Edition*

from the Gentiles: Hellenistic Philosophy and Early Christianity Abraham J. Malherbe, 2013-10-10 Rather than viewing the Graeco Roman world as the background against which early Christian texts should be read Abraham J Malherbe saw the ancient Mediterranean world as a rich ecology of diverse intellectual traditions that interacted within specific social contexts These essays spanning over fifty years illustrate Malherbe's appreciation of the complexities of this ecology and what is required to explore philological and conceptual connections between early Christian writers especially Paul and Athenagoras and their literary counterparts who participated in the religious and philosophical discourse of the wider culture Malherbe's essays laid the groundwork for his magisterial commentary on the Thessalonian correspondence and launched the

contemporary study of Hellenistic moral philosophy and early Christianity **The Anthem Companion to Karl Jaspers**
Hans Joas, Matthias Bormuth, 2025-04-15 This collection of articles by an international group of leading experts has its special focus on the relevance of Karl Jaspers's philosophy for the social sciences. It also includes classical evaluations of Jaspers's thinking by renowned authors Talcott Parsons and Jürgen Habermas. Several chapters are devoted to the relationship between Jaspers and his teacher Max Weber, his famous student Hannah Arendt, and crucial figures in his intellectual world: Wilhelm Dilthey, Georg Simmel. Others deal with his relevance for disciplines from psychiatry to the study of religion and the historico-sociological research about the Axial Age, a term coined by Jaspers. In his introduction, editor Hans Joas tries to systematise Jaspers's relevance for the contemporary social sciences and to explain why Parsons had called him a social scientist's philosopher. The book promises to become an indispensable source in the re-evaluation of Jaspers's thinking in the years to come.

The Structure of Scientific Theories Frederick Suppe, 1977 A clear and comprehensive introduction to contemporary philosophy of science. American Scientist. The best account of scientific theory now available, one that surely commends itself to every philosopher of science with the slightest interest in metaphysics. Review of Mathematics. It should certainly be of interest to those teaching graduate courses in philosophy of science and to scientists wishing to gain a further appreciation of the approach used by philosophers of science.

Interpreting across Boundaries Gerald James Larson, Eliot Deutsch, 2014-07-14 This volume is a state-of-the-art assessment of comparative philosophy written by some of the leading practitioners of the field. While its primary focus is on gaining methodological clarity regarding the comparative enterprise of interpreting across boundaries, the book also contains new substantive essays on Indian, Chinese, Japanese, and European thought. The contributors are Roger T. Ames, William Theodore de Bary, Wing-tsit Chan, A. S. Cua, Eliot Deutsch, Charles Hartshorne, Daya Krishna, Gerald James Larson, Sengaku Mayeda, Hajime Nakamura, Raimundo Panikkar, Karl H. Potter, Henry Rosemont Jr., Ben-Ami Scharfstein, Ninian Smart, Fritz Staal, and Frederick J. Streng. Comparative or cross-cultural philosophy can be seen as a relative newcomer to the field of philosophy. It has its antecedents in the emergence of comparative studies in nineteenth-century European intellectual history, as well as in the sequence of East-West Philosophers' Conferences at the University of Hawaii, which began in 1939. This book will prove to be of great significance in helping to define a field that is only now becoming fully self-conscious methodologically and substantively about its role and function in the larger enterprises of philosophy and comparative studies. Originally published in 1988, The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.
