Hawkins,2018-10-25 Biodiversity of the food system is crucial for food production and loss of biodiversity is a pressing issue This book focuses on biodiversity s crucial role in food systems health and well being and fate of the natural environment It provides practical recommendations on how proper food systems can sustain a healthier planet and protect biodiversity Sections provide a comprehensive understanding of the urgent need for promoting biodiversity promoting food systems that help maintain planetary boundaries that are at risk mimic the natural processes of highly integrated ecosystems and improve human planetary health while providing a wholesome and sufficient food supply *Smart Cities as Democratic Ecologies* Daniel Araya,2015-11-17 The concept of the smart city as the confluence of urban planning and technological innovation has become a predominant feature of public policy discourse Despite its expanding influence however there is little consensus on the precise meaning of a smart city One reason for this ambiguity is that the term means different things to different disciplines For some the concept of the smart city refers to advances in sustainability and green technologies For others it refers to the deployment of

information and communication technologies as next generation infrastructure This volume focuses on a third strand in this discourse specifically technology driven changes in democracy and civic engagement In conjunction with issues related to power grids transportation networks and urban sustainability there is a growing need to examine the potential of smart cities as democratic ecologies for citizen empowerment and user driven innovation What is the potential of smart cities to become platforms for bottom up civic engagement in the context of next generation communication data sharing and application development What are the consequences of layering public spaces with computationally mediated technologies Foucault's notion of the panopticon a metaphor for a surveillance society suggests that smart technologies deployed in the design of smart cities should be evaluated in terms of the ways in which they enable or curtail new urban literacies and emergent social practices

City Planning for the Public Manager Nicolas A. Valcik, Todd A. Jordan, Teodoro J. Benavides, Andrea D. Stigdon, 2017-09-14 Why should public administrators care about city planning Is city planning not a field ruled by architects and public works personnel Much of city planning in fact requires expertise in areas other than buildings and infrastructure and with city planning expertise urban administrators are empowered to make more informed decisions on matters that involve budgeting economic development tax revenues public relations and ordinances and policies that will benefit the community *City Planning for the Public Manager* is designed to fill a gap in the urban administration literature offering students and practitioners hands on practical advice from experts with diverse city administration experience and demonstrating where theory and practice intersect Divided into three sections the book provides an overview of the life cycle of a municipality and its services explores city planning applications for planners on a strict budget and walks the reader through a real life planning research project demonstrating how it was formulated implemented and analyzed to produce usable results Topics explored include justifications for specific city services internal and external benchmarking used for city planning common technical tools e g GIS legal aspects of planning and zoning environmental concerns transportation residential planning business district planning and infrastructure *City Planning for the Public Manager* is required reading for students of urban administration and practicing city administrators interested in improving their careers and their communities

Rationalizing Rural Area Classifications for the Economic Research Service National Academies of Sciences, Engineering, and Medicine, Division of Behavioral and Social Sciences and Education, Committee on National Statistics, 2016-02-05 The U S Department of Agriculture Economic Research Service USDA ERS maintains four highly related but distinct geographic classification systems to designate areas by the degree to which they are rural The original

urban rural code scheme was developed by the ERS in the 1970s Rural America today is very different from the rural America of 1970 described in the first rural classification report At that time migration to cities and poverty among the people left behind was a central concern The more rural a residence the more likely a person was to live in poverty and this relationship held true regardless of age or race Since the 1970s the interstate highway system was completed and broadband was developed Services have become more consolidated into larger centers Some of the traditional rural industries farming and mining have prospered and there has been rural amenity based in migration Many major structural and economic changes have occurred during this period These factors have resulted in a quite different rural economy and society since 1970 In April 2015 the Committee on National Statistics convened a workshop to explore the data estimation and policy issues for rationalizing the multiple classifications of rural areas currently in use by the Economic Research Service ERS Participants aimed to help ERS make decisions regarding the generation of a county rural urban scale for public use taking into consideration the changed social and economic environment This report summarizes the presentations and discussions from the workshop

Comparative Urban Land Use Planning Les Stein, 2017-09-25 Throughout the world city planners and governments grapple with the challenges of urban planning using remarkably similar land use regimes Yet the realisation is increasing that real urban problems crime decay drug abuse inequality depression and alienation are not easily solved by the classic devices of a strategic plan and a zoning map Planning regimes are therefore in constant flux as planners and governments adjust and experiment to address these problems often with little awareness as to what they are trying to accomplish In *Comparative Urban Land Use Planning Best Practice* Leslie A Stein digs deeper drawing on examples from around the world to discover the best practice responses to the critical issues of planning and urban social problems Although every city has its own cultural and political milieu patterns of change and levels of success can be discerned and universal lessons learned By comparing different urban planning approaches and considering their underlying ideologies and assumptions he proposes a more insightful approach to the role of land use planning This book is both scholarly and emotional expressing a great love of cities and calling for a more clear eyed approach for their care

Best Practices in Metropolitan Transportation Planning Reid Ewing, Keith Bartholomew, 2018-06-27 Planning at a metropolitan scale is important for effective management of urban growth transportation systems air quality and watershed and green spaces It is fundamental to efforts to promote social justice and equity *Best Practices in Metropolitan Transportation Planning* shows how the most innovative metropolitan planning organizations MPOs in the United States are addressing these issues using their mandates to improve transportation networks while pursuing emerging sustainability goals at the same time As both a policy analysis and a practical how to guide this book presents cutting edge original research on the role accessibility plays and should play in transportation planning tracks how existing plans have sought to balance competing priorities using scenario planning and other strategies assesses the results of various efforts to reduce automobile dependence in cities and

explains how to make planning documents more powerful and effective In highlighting the most innovative practices implemented by MPOs regional planning councils city and county planning departments and state departments of transportation this book aims to influence other planning organizations as well as influence federal and state policy discussions and legislation Urban Environmental Policy Analysis Heather E. Campbell, Elizabeth A Corley, 2015-02-12 This timely book provides a wealth of useful information for following through on today s renewed concern for sustainability and environmentalism It s designed to help city managers policy analysts and government administrators think comprehensively and communicate effectively about environmental policy issues The authors illustrate a system based framework model of the city that provides a holistic view of environmental media land air and water while helping decision makers to understand the extent to which environmental policy decisions are intertwined with the natural built and social systems of the city They go on to introduce basic and environment specific policy analytic models methods and tools presents numerous specific environmental policy puzzles that will confront cities and introduces methods for understanding and educating public opinions around urban environmental policy The book is grounded in the policy analytic perspective rather than political science economic or planning frameworks It includes both new scholarship and synthesis of existing policy analysis Numerous tables figures checklists and maps as well as a comprehensive reference list are included *Climate Change, Policy and Security* Donald Wallace, Daniel Silander, 2018-04-17 This book examines the multiple strategies proposed by the international community for addressing global climate change GCC from both human and state security perspectives It examines what is needed from major states working within the UN framework to engage with the multiple dimensions of a strategy that addresses GCC and its impacts where such engagement promotes both human and state security Two broad frameworks for approaching these issues provide the basis of discussion for the individual chapters which discuss the strategies being undertaken by major state powers the US the EU China India Japan and Russia The first framework considers the multiple strategies mitigation adaptation and capacity building required of the international community to address the effects of GCC The second framework considers the differentiation of GCC policies in terms of security and how the efficacy of these strategies could be impacted by whether priority is given to state security over human security concerns This book will be of much interest to students of human security climate change foreign policy and International Relations
