## **Philosophizing Ad Infinitum Suny Series In Environmental Philosophy And Ethics:**

Philosophizing ad Infinitum Marcel Conche, 2014-05-08 One of France's preeminent historians of philosophy Marcel Conche has written and translated more than thirty five books and is recognized for his groundbreaking and authoritative work in Greek philosophy as well as on Montaigne. In *Philosophizing ad Infinitum* one of his most remarkable and daring books Conche articulates a unique and powerful understanding of nature inclusive of humanity as infinite in time and space ever self-renewing eternal and beyond complete understanding or control. In today's world the notion of infinity is at the core of the crisis humanity faces understanding nature. For the last two hundred years economies have been running at full speed fueled by the implicit belief that natural resources are infinite however it is clear that they are not and that humanity needs to radically rethink the foundations of environmental and economic systems. Conche seeks to begin this rethinking illustrating along the way insightful and sometimes unorthodox ideas about Plato Aristotle Epicurus Montaigne Nietzsche Bergson and others. SUNY Series in Environmental Philosophy and Ethics, 20?? Hans Jonas's Ethic of Responsibility Theresa Morris, 2013-11-01 Despite his tremendous impact on the German Green Party and the influence of his work on contemporary debates about stem cell research in the United States Hans Jonas's 1903-1993 philosophical contributions have remained partially obscured. In particular the ontological grounding he gives his ethics based on a phenomenological engagement with biology to bridge the is-ought gap has not been fully appreciated. Theresa Morris provides a comprehensive overview and analysis of Jonas's philosophy that reveals the thread that runs through all of his thought including his work on the philosophy of biology ethics the philosophy of technology and bioethics. She places Jonas's philosophy in context comparing his ideas to those of other ethical and environmental philosophers and demonstrating the relevance of his thought for our current ethical and environmental problems. Crafting strong supporting arguments for Jonas's insightful view of ethics as a matter of both reason and emotion Morris convincingly lays out his account of the basis of our responsibilities not only to the biosphere but also to current and future generations of beings. **The Incomplete Eco-Philosopher** Anthony Weston, 2009-01-15 Collected essays present Weston's pragmatic environmental philosophy calling for reconstruction and imagination rather than deconstruction and analysis. A World Not Made for Us Keith R. Peterson, 2020-09-01 In *A World Not Made for Us* Keith R. Peterson provides a broad reassessment of the field of environmental philosophy taking a fresh and critical look at three classical problems of environmentalism the intrinsic value of nature the need for an ecological worldview and a new conception of the place of humankind in nature. He makes the case that a genuinely critical environmental philosophy must adopt an ecological materialist conception of the human a pluralistic value theory that emphasizes the need for value prioritization and a stratified categorical ontology that affirms the basic principle of human asymmetrical dependence on more than human nature. Integrating environmental ethics with the latest work in political ecology Peterson argues it is important to understand that the world is not made for us and that coming to terms with this

fact is a condition for survival in future human and more than human communities of liberation and solidarity      **Value, Beauty, and Nature** Brian G Henning, 2023-12 Argues that to make progress within environmental ethics philosophers must explicitly engage in environmental metaphysics      For Love of Matter Freya Mathews, 2003-08-14 A bold and original work in ecocosmology and metaphysics      *Earth Summit Ethics* J. Baird Callicott, Fernando J. R. da Rocha, 1996-08-23 On the eve of the 1992 Earth Summit in Rio de Janeiro Fernando J R da Rocha challenged environmental philosophers to suggest and develop effective ways in which universities might engender ecological literacy and environmental ethics The result was a preconference held in Porto Alegre Brazil whose aim was to put the summit in philosophical perspective influence its outcome and chart a new course linking environment and ethics through university education This book is an outgrowth of the Porto Alegre conference and the international environmental philosophers and educators represented here inaugurate a constructive dialogue that will continue well into the twenty first century Among the contributors to the volume are environmental philosophers Andrew Brennan J Baird Callicott Fernando J R da Rocha and Holmes Ralston III and education theorists Peter Madsen and John Lemons In addition the book introduces English language readers to the work of French philosopher Catherine Larrere Spanish philosopher Nicholas Sosa and Brazil's radical former Secretary for the Environment and deep ecologist Jose Lutzenberger      *Merleau-Ponty and Environmental Philosophy* Suzanne L. Cataldi, William S. Hamrick, 2007-04-24 This richly diverse collection looks at the contemporary relevance of the philosophy of Maurice Merleau Ponty to environmental issues and builds a coherent philosophical ecology based on his thought The contributors describe and analyze relations within the natural world by focusing on the centrality of relations in Merleau Ponty's work his concept of the bond between humanity and nature and his novel philosophies of perception embodiment and wild Being Eco phenomenologies of living places such as Central Park in New York City Midwestern farmlands and communal household dwellings of Pacific Northwest Coast people are closely examined The contributors also explore Merleau Ponty's philosophy for environmental ethics and develop notions such as vital values somatic empathy and interspecies sociality

Environmental Philosophy Simon P. James, 2015-06-03 Climate change habitat loss rising extinction rates such problems call for more than just new policies and practices They raise fundamental questions about the world and our place in it What for instance is the natural world Do we humans belong to it Which parts of it are we morally obliged to protect Drawing on an exceptionally wide range of sources from virtue ethics to Buddhism leading environmental philosopher Simon P James sets out to answer these vitally important questions The book begins with a discussion of animal minds before moving on to explore our moral relations with non human organisms ecosystems and the earth as a whole James then considers environmental aesthetics humanity's place in the natural world and the question of what it means to be wild In the concluding chapter he applies his findings to the topic of global climate change building a strong moral case for urgent action This accessible entertainingly written book will be essential reading for students of the environment across the

humanities and social sciences It will moreover be an ideal guide for anyone keen to deepen their understanding of environmental issues     Merleau-Ponty and Environmental Philosophy Sue L. Cataldi, William S. Hamrick, 2007 This richly diverse collection looks at the contemporary relevance of the philosophy of Maurice Merleau Ponty to environmental issues and builds a coherent philosophical ecology based on his thought The contributors describe and analyze relations within the natural world by focusing on the centrality of relations in Merleau Ponty s work his concept of the bond between humanity and nature and his novel philosophies of perception embodiment and wild Being Eco phenomenologies of living places such as Central Park in New York City Midwestern farmlands and communal household dwellings of Pacific Northwest Coast people are closely examined The contributors also explore Merleau Ponty s philosophy for environmental ethics and develop notions such as vital values somatic empathy and interspecies sociality     Environmental Philosophy Hugh P.

McDonald, 2014-05-10 Environmental Philosophy A Revaluation of Cosmopolitan Ethics from an Ecocentric Standpoint calls for a new approach to ethics Starting from the necessity for all life of air water and food the book revalues the relation of ethics and environmentalism Using insights of the environmental ethicists environmental ethics becomes the model for ethics as a whole Humans are part of a larger environment Cosmopolitanism should be revised in accord with environmental ethics The book applies a new theory of values to the relation of value and obligation and of duty rights and virtue to accord with ecocentrism The book also critically evaluates Utilitarianism and the self interest theory Other chapters address population species preservation and a practical program for environmental policy     **An Invitation to Environmental Philosophy** Anthony Weston, David Abram, 1999 This short accessible and provocative work is a perfect invitation to the burgeoning field of environmental ethics It raises basic questions tells compelling stories and offers a range of philosophical responses The book is built around five individually authored chapters each a unique contribution by a major author in the field 8 photos

**Skeptical Environmentalism** Robert Kirkman, 2002-02 In Skeptical Environmentalism Robert Kirkman raises doubts about the speculative tendencies elaborated in environmental ethics deep ecology social ecology postmodern ecology ecofeminism and environmental pragmatism Drawing on skeptical principles introduced by David Hume Kirkman takes issue with key tenets of speculative environmentalism namely that the natural world is fundamentally relational that humans have a moral obligation to protect the order of nature and that understanding the relationship between nature and humankind holds the key to solving the environmental crisis Engaging the work of Kant Hegel Descartes Rousseau and Heidegger among others Kirkman reveals the relational worldview as an unreliable basis for knowledge and truth claims and more dangerously as harmful to the intellectual sources from which it takes inspiration Exploring such themes as the way knowledge about nature is formulated what characterizes an ecological worldview how environmental worldviews become established and how we find our place in nature Skeptical Environmentalism advocates a shift away from the philosopher s privileged position as truth seeker toward a more practical thinking that balances conflicts between values and worldviews     *A Companion to*
