 last 15 years Constantine Sandis has advanced our understanding of the role that action plays in shaping our moral thought
 In this collection of his best essays in the philosophy of action Sandis brings together updated versions of his writings
 accompanied by a new introduction Read collectively they demonstrate the breadth of his interests and ability to relate to
 broader issues within the culture connecting debates in philosophical psychology about motivation negligence and moral
 responsibility with Greek tragedy social psychology and literature Along this path from action to ethics Sandis engages with
 Hegel Wittgenstein Anscombe Ricoeur Davidson and Dretske together with contemporary authors such as Jennifer Hornsby
 and Jonathan Dancy As he responds to each thinker and theme he develops his own philosophical position the key thesis of
 which is that philosophy of action without ethics is empty ethics without philosophy of action is blind **Contestatory**
Cosmopolitanism Tom Bailey, 2018-10-11 Contemporary global politics poses urgent challenges from humanitarian
 migratory and environmental problems to economic religious and military conflicts that strain not only existing political
 systems and resources but also the frameworks and concepts of political thinking The standard cosmopolitan response is to
 invoke a sense of global community governed by such principles as human rights or humanitarianism free or fair trade global
 equality multiculturalism or extra national democracy Yet the contours grounds and implications of such a global community
 remain notoriously controversial and it risks abstracting precisely from the particular and conflictual character of the
 challenges which global politics poses The contributions to this collection undertake to develop a more fruitful cosmopolitan
 response to global political challenges one that roots cosmopolitanism in the particularity and conflict of global politics itself
 They argue that this contestatory cosmopolitanism must be dialectical agonistic and democratic that is its concepts and
 principles must be developed immanently and critically out of prevailing normative resources they must reflect and
 acknowledge their antagonistic roots and they must be the result of participatory and self determining publics In elaborating
 this alternative the contributions also return to neglected cosmopolitan theorists like Hegel Adorno Arendt Camus Derrida
 and Mouffe and reconsider mainstream figures such as Kant and Habermas This collection was originally published as a
 special edition of Critical Horizons The Routledge Companion to Hermeneutics Jeff Malpas, Hans-Helmuth
 Gander, 2014-11-20 Hermeneutics is a major theoretical and practical form of intellectual enquiry central not only to
 philosophy but many other disciplines in the humanities and social sciences With phenomenology and existentialism it is also
 one of the twentieth century's most important philosophical movements and includes major thinkers such as Heidegger
 Gadamer and Ricoeur The Routledge Companion to Hermeneutics is an outstanding guide and reference source to the key

philosophers topics and themes in this exciting subject and is the first volume of its kind Comprising over fifty chapters by a team of international contributors the Companion is divided into five parts main figures in the hermeneutical tradition movement including Heidegger Gadamer and Ricoeur main topics in hermeneutics such as language truth relativism and history the engagement of hermeneutics with central disciplines such as literature religion race and gender and art hermeneutics and world philosophies including Asian Islamic and Judaic thought hermeneutic challenges and debates such as critical theory structuralism and phenomenology

Practical Identity and Narrative Agency Kim Atkins, Catriona Mackenzie, 2013-05-13 The essays collected in this volume address a range of issues that arise when the focus of philosophical reflection on identity is shifted from metaphysical to practical and evaluative concerns They also explore the usefulness of the notion of narrative for articulating and responding to these issues The chapters written by an outstanding roster of international scholars address a range of complex philosophical issues concerning the relationship between practical and metaphysical identity the embodied dimensions of the first personal perspective the kind of reflexive agency involved in the self constitution of one's practical identity the relationship between practical identity and normativity and the temporal dimensions of identity and selfhood In addressing these issues contributors engage with debates in the literatures on personal identity phenomenology moral psychology action theory normative ethical theory and feminist philosophy

Explanation in Action Theory and Historiography Gunnar Schumann, 2019-05-29 Is the appropriate form of human action explanation causal or rather teleological While this is a central question in analytic philosophy of action it also has implications for questions about the differences between methods of explanation in the sciences on the one hand and in the humanities and the social sciences on the other Additionally this question bears on the problem of the appropriate form of explanations of past human actions and therefore it is prominently discussed by analytic philosophers of historiography This volume brings together causalists and anti causalists to address enduring philosophical questions at the heart of this debate as well as their implications for the practice of historiography Part I considers the quarrel between causalism and anti causalism in recent developments in the philosophy of action Part II presents papers by causalists and anti causalists that are more narrowly focused on the philosophy of historiography

Mental Action and the Conscious Mind Michaela Brent, Lisa Miracchi Titus, 2022-07-15 Mental action deserves a place among foundational topics in action theory and philosophy of mind Recent accounts of human agency tend to overlook the role of conscious mental action in our daily lives while contemporary accounts of the conscious mind often ignore the role of mental action and agency in shaping consciousness This collection aims to establish the centrality of mental action for discussions of agency and mind The thirteen original essays provide a wide ranging vision of the various and nuanced philosophical issues at stake Among the questions explored by the contributors are Which aspects of our conscious mental lives are agential Can mental action be reduced to and explained in terms of non agential mental states processes or events Must mental action be included among

the ontological categories required for understanding and explaining the conscious mind more generally Does mental action have implications for related topics such as attention self knowledge self control or the mind body problem By investigating the nature scope and explanation of mental action the essays presented here aim to demonstrate the significance of conscious mental action for discussions of agency and mind Mental Action and the Conscious Mind will be of interest to scholars and graduate students working in philosophy of mind philosophy of action and philosophy of agency as well as to philosophically inclined cognitive scientists Tragedy, Recognition, and the Death of God Robert R. Williams, 2012-09-27 Hegel and Nietzsche are two of the most important figures in philosophy and religion Robert R Williams challenges the view that they are mutually exclusive He identifies four areas of convergence First Hegel and Nietzsche express and define modern interest in tragedy as a philosophical topic Each seeks to correct the traditional philosophical and theological suppression of a tragic view of existence This suppression of the tragic is required by the moral vision of the world both in the tradition and in Kant's practical philosophy and its postulates For both Hegel and Nietzsche the moral vision of the world is a projection of spurious life negating values that Nietzsche calls the ascetic ideal and that Hegel identifies as the spurious infinite The moral God is the enforcer of morality Second while acknowledging a tragic dimension of existence Hegel and Nietzsche nevertheless affirm that existence is good in spite of suffering Both affirm a vision of human freedom as open to otherness and requiring recognition and community Struggle and contestation have affirmative significance for both Third while the moral God is dead this does not put an end to the God question Theology must incorporate the death of God as its own theme The union of God and death expressing divine love is for Hegel the basic speculative intuition This implies a dipolar panentheistic concept of a tragic suffering God who risks loves and reconciles Fourth Williams argues that both Hegel and Nietzsche pursue theodicy not as a justification of the moral God but rather as a question of the meaningfulness and goodness of existence despite nihilism and despite tragic conflict and suffering The inseparability of divine love and anguish means that reconciliation is no conflict free harmony but includes a paradoxical tragic dissonance reconciliation is a disquieted bliss in disaster **Action and Existence** J. Swindal, 2011-11-08 Since the pioneering work of Donald Davidson on action many philosophers have taken critical stances on his causal account This book criticizes Davidson's event causal view of action and offers instead an agent causal view both to describe what an action is and to set a framework for how actions are explained **Handbook of Legal Reasoning and Argumentation** Giorgio Bongiovanni, Gerald Postema, Antonino Rotolo, Giovanni Sartor, Chiara Valentini, Douglas Walton, 2018-07-02 This handbook addresses legal reasoning and argumentation from a logical philosophical and legal perspective The main forms of legal reasoning and argumentation are covered in an exhaustive and critical fashion and are analysed in connection with more general types and problems of reasoning Accordingly the subject matter of the handbook divides in three parts The first one introduces and discusses the basic concepts of practical reasoning The second one discusses the general structures and procedures of

reasoning and argumentation that are relevant to legal discourse The third one looks at their instantiations and developments of these aspects of argumentation as they are put to work in the law in different areas and applications of legal reasoning

Conversations on Human Action and Practical Rationality Susana Cadilha, Carlos Mauro, Sofia Miguens, 2013-07-16 This volume brings together leading scholars in the study of practical rationality and human action namely Alfred Mele Hugh McCann Michael Bratman George Ainslie Daniel Hausman and Joshua Knobe They were interviewed by the editors in a project based at the Institute of Philosophy of the University of Porto structured around the questions 1 In your view what are the most central or important problems in the philosophy of action 2 For some or all of the following action agency agent what do they contrast with most significantly 3 Which of these are liable to be rational irrational 4 In what sense is the thing to do to be decided by what is rational Are there limits of rationality 5 What explains action and how What is the role of deliberation in rationality 6 How is akrasia possible if you think it is 7 How do you think your own work has contributed to the field What are your plans for future research The outcome is of great interest not only for philosophers but also for economists psychologists political scientists and sociologists

Collective Action in Post-colonial Societies Sepetla Molapo, 2025-02-11 This book offers an exploration of collective action by bringing together the themes of sovereignty and solidarity in post colonial societies in Africa and beyond It does so against a common tradition of writing about collective action that assumes an opposition between the state as a legal framework of unity and social movements that express the aspirations of marginalized people The book s examination of collective action resists this binary division It states that sovereignty can be imagined beyond the confines of the law and consequently beyond the centrality of the state Power therefore appears as a construct of forces and factors that signal or gesture to a complex but fascinating way of imagining collective action These forces and factors open our eyes to the dynamics of life in post colonial societies in ways that the understanding of sovereignty centred on law conceals Brought into an intimacy with solidarity sovereignty opens collective action to nuanced complex and multiple configurations that surpass binary thinking This is an innovative approach and of interest to students and scholars from across the social sciences

Free Will and Action Explanation Scott Robert Sehon, 2016 Do we have free will and moral responsibility Is free will compatible with determinism Scott Sehon addresses these key questions by focusing on an underlying issue the nature of action explanation He proposes a non causal account of action and agency according to which reason explanation of human behavior is teleological rather than causal
