The Gender of Photography Nicole Hudgins,2020-09-02 It would be unthinkable now to omit early female pioneers

from any survey of photography's history in the Western world. Yet for many years the gendered language of American, British, and French photographic literature made it appear that women's interactions with early photography did not count as significant contributions. Using French and English photo journals, cartoons, art criticism, novels, and early career guides aimed at women, this volume will show why and how early photographic clubs, journals, exhibitions, and studios insisted on masculine values and authority and how Victorian women engaged with photography despite that dominant trend. Focusing on the period before 1890 when women were yet to develop the self-assurance that would lead to broader recognition of the value of their work, this study probes the mechanisms by which exclusion took place and explores how women practiced photography anyway, both as amateurs and professionals. Challenging the marginalization of women's work in the early history of photography, this is essential reading for students and scholars of photography history and gender studies.

Commemorating and Forgetting Martin J. Murray, 2013-04-25. When the past is painful as riddled with violence and injustice as it is in postapartheid South Africa, remembrance presents a problem at once practical and ethical: how much of the past to preserve and recollect and how much to erase and forget if the new nation is to ever unify and move forward. The new South Africa's confrontation of this dilemma is Martin J. Murray's subject in *Commemorating and Forgetting*. More broadly, this book explores how collective memory works: how framing events, persons, and places worthy of recognition and honor entails a selective appropriation of the past, not a mastery of history. How is the historical past made to appear in the present? In addressing these questions, Murray reveals how collective memory is stored and disseminated in architecture, statuary, monuments, and memorials; literature and art landscapes of remembrance that selectively recall and even fabricate history in the service of nation building. He examines such vehicles of memory in postapartheid South Africa and parses the stories they tell: stories by turn sanitized, distorted, embellished, and compressed. In this analysis, *Commemorating and Forgetting* marks a critical move toward recognizing how the legacies and impositions of white minority rule far from being truly past remain embedded in, intertwined with, and imprinted on the new nation's here and now.
