brought preferences for specific spellings to reflect their unique branches in the wing chun evolutionary tree Because of this I have not standardized the romanization in this anthology as it does not greatly effect the reading In chapter one Dr Chaudhuri analyzes the keys to motion in the second empty hand form of wing chun the bridge seeking routine The focus is on the proper maintenance of the body s central axis and its motions which helps with developing the foundations for delivering power In the following chapter Jeff Webb discusses the structure and body mechanics of punching techniques plus various training methods employed for developing power Also punching strategy is shown as the greatest factor in differentiating these punches from those of other styles Chaudhuri then analyzes the structure and function of the primary stance in wing chun s first form sil lim tao which instills the relational structure of bone ligament joint tendon muscle line and angle while also teaching the inner virtues of softness stillness sinking and emptiness Two following chapters are by Jeff Webb The ability to apply martial art techniques at a high rate of speed is essential to overall fighting effectiveness By looking beyond the physical to the conceptual he details wing chun s theories that reveal proper timing to be a significant multiplier His final piece describes both the fundamental and complex methods of sticking hands training in detail It also explains the rationale and theories behind this method as well as discusses a variety of factors that can either improve or retard the acquisition of tactile reflexes The final two chapters by Chuadhuri and Webb presents some of their favorite techniques The content of these chapters explain wing chun rationale and unique fighting methods plus provides logic and advice to benefit the practitioner
