

Hospice Face-to-Face Encounter Final Rule Published

Summary at a Glance:

Late Tuesday afternoon, November 2nd, the Federal Register posted the final rule for the Hospice Face-to-Face Encounter as part of the Final Rule entitled: Medicare Program; Home Health Prospective Payment System Rule Update for Calendar Year 2011; Changes in Certification Requirements for Home Health Agencies and Hospices. Highlights in the final rule are as follows:

- A hospice physician, hospice Nurse Practitioner, or incident/fellow physician rotating through the hospice may perform the face-to-face encounter.
- CMS clarified that the face-to-face encounter is based on benefit periods and not on actual days of care.
- Visit Timeliness is now 30 days. CMS has expanded the time frame for face-to-face encounters to 30 days prior to the start of the 180-day recertification, and each subsequent recertification.
- CMS has changed the language to 418.22 (CJ4) from "must visit" to "have a face-to-face encounter" in order to make clear that the hospice has flexibility for the practitioner to see the patient – either at the patient's home or by the patient coming to see the physician or NP.

Clarification that the face-to-face encounter is NOT billable. The billing regulations for hospices do not allow for physician reimbursement for administrative activities of physicians.

The Requirement:

The Affordable Care Act amends section 1814(a)(17) of the Social Security Act to require that on and after January 1, 2011, a hospice physician or nurse practitioner (NP) must have a face-to-face encounter with every hospice patient to determine the continued eligibility of that patient prior to the 180-day recertification, and prior to each subsequent recertification. Furthermore, the Affordable Care Act requires that the hospice physician or NP attest that such a visit took place, in accordance with procedures established by the Secretary of the HHS.

Specific provisions in the final rule:

1. Who Can Perform the Encounter?

Physicians:

- **Certifying terminal illness:** By statute, only a physician (not a NP) may certify a patient's terminal illness.
- **Definition of hospice physician:** A "hospice physician" is a physician either employed by or working under arrangements with a hospice (i.e., contractors).
- **Increased accountability:** By limiting "hospice physician" to those physicians who are employed by or working under contract with a hospice, CMS also increases accountability, as the hospice is in control of its employees and contracted physicians.

Improving Palliative Care for Cancer National Research Council, Commission on Life Sciences, Institute of Medicine, National Cancer Policy Board, 2001-06-15 It is innately human to comfort and provide care to those suffering from cancer particularly those close to death Yet what seems self evident at an individual personal level has by and large not guided policy at the level of institutions in this country There is no argument that palliative care should be integrated into cancer care from diagnosis to death But significant barriers attitudinal

behavioral economic educational and legal still limit access to care for a large proportion of those dying from cancer and in spite of tremendous scientific opportunities for medical progress against all the major symptoms associated with cancer and cancer death public research institutions have not responded In accepting a single minded focus on research toward cure we have inadvertently devalued the critical need to care for and support patients with advanced disease and their families This report builds on and takes forward an agenda set out by the 1997 IOM report Approaching Death Improving Care at the End of Life which came at a time when leaders in palliative care and related fields had already begun to air issues surrounding care of the dying That report identified significant gaps in knowledge about care at the end of life and the need for serious attention from biomedical social science and health services researchers Most importantly it recognized that the impediments to good care could be identified and potentially remedied The report itself catalyzed further public involvement in specific initiatives mostly pilot and demonstration projects and programs funded by the nonprofit foundation community which are now coming to fruition
