Words that Count: A Guide to Writing Analytical Essays about Fiction Kate Sheckler, 2019-01-01 Language is complex Written or spoken the complexity of language makes the medium the versatile tool we need but also creates the potential for a wide variety of misunderstandings and mistakes Whether we are attempting to understand a piece of fiction or writing a text to make our thoughts comprehensible to others the complexity of language is both necessary and fraught That said the inevitable pitfalls don't mean we need to sacrifice precision or accuracy This guide is a step by step process that offers hands on methods for accurate analysis and precise essay construction Chapter one deals with a variety of methods by which to approach stories and novels such that your analysis is structured on carefully constructed logical progression founded on the primary text rather than on hunches and guesswork and chapter two offers infrastructures and scaffolding on which any essay can be structured The structures included in chapter two are not a template and thus do not limit style or content rather they are based on a series of tasks that must be completed for an argument to be convincing As such the tasks offer a kind of map through the process of essay writing that always indicates your next step Contrary to accepted mythologies about analyzing fiction and writing essays neither is a guessing game and this text can help you remove the guesswork from your own process

Securing a Place for Reading in Composition Ellen C. Carillo, 2015-01-15 *Securing a Place for Reading in Composition* addresses the dissonance between the need to prepare students to read not just write complex texts and the lack of recent scholarship on reading writing connections Author Ellen C Carillo argues that including attention to reading practices is crucial for developing more comprehensive literacy pedagogies Students who can read actively and reflectively will be able to work successfully with the range of complex texts they will encounter throughout their post secondary academic careers and beyond Considering the role of reading within composition from both historical and contemporary perspectives Carillo makes recommendations for the productive integration of reading instruction into first year writing courses She details a mindful reading framework wherein instructors help students cultivate a repertoire of approaches upon which they consistently reflect as they apply them to various texts This metacognitive frame allows students to become knowledgeable and deliberate about how they read and gives them the opportunity to develop the skills useful for moving among reading approaches in mindful ways thus preparing them to actively and productively read in courses and contexts outside first year composition *Securing a Place for Reading in Composition* also explores how the field of composition might begin to effectively address reading including conducting research on reading revising outcome statements and revisiting the core courses in graduate programs It will be of great interest to writing program administrators and other compositionists
