Re: Theodore Gardner; examination of the skeletal remains. Case # *(fill in a number)*.

Introduction:

On the 19th day of January 2011, at approximately *(give time class begins)* the remains of Theodore Gardner were exhumed. Dr. Sheila Gonzalez presented the skeletal remains to her lab assistants. Dr. Gonzalez and her team began the investigation ordered by the Grand Jury into the death of the 15 year old male. An autopsy of the skeletal remains was performed. The complete skeleton was comprised of *(list the 2 divisions of the skeletal system & the groups of bones contained in each)*. The lab assistants were given the instructions to analyze and research facts collected via physical observations and radiographs and to explain and analyze causes and processes that occurred regarding the evidence gathered.

Skeletal Assessment:

(Discuss the evidence gathered concerning the skeletal remains of Theo Gardner... use appropriate vocabulary from chapter)

Analysis:

(Explain and analyze causes and processes that occurred that would result in the evidence you collected from the Theo Gardner's bones.)

Expert Opinion:

(Draw a conclusion with your expert team concerning whether Theo was abused by his aunt and uncle or his death was simply an untimely event)

Things to consider as you investigate the death of Theo Gardner and write your Forensic report:

- What is the most compelling piece of evidence in the case for your conclusion?
 - o What is not so compelling?
 - o Is there anything in the case that your group found irrelevant?
 - o What is not so compelling?
 - o Is there anything in the case that your group found irrelevant?

Writing Guide For Computer Forensic Reports

Writing Guide For Computer Forensic Reports:

Report Writing Handbook for the Computer Forensics Examiner Bruce Pixley, 2014-03-11 The Report Writing Handbook for the Computer Forensic Examiner is intended to be the student manual in a formal law enforcement report writing class which is geared for computer forensic examiners who are tasked with writing an expert witness report and may be called to testify in trial. It starts off by laying the foundation of expert witness report writing. It demonstrates the difference between electronic discovery productions and writing an expert forensic report. The forensic report not only contains the basics that should be in any report but also the expert's opinions which are based on factual objective findings. This book contains the following sections:

- Starting Your Analysis** There are many ways to start the analysis and this section provides some structure to help quickly triage the analysis. By walking the path the examiner can quickly pick up on how a person used the computer which provides direction for follow up analysis.
- Use of virtual environment software** such as VMware can be an extremely valuable aid during the analysis and for providing a demonstrative exhibit.
- Case Study** To help prepare for the report writing section a sample case study is provided. This case walks through potentially relevant information that was discovered through the forensic analysis. Screenshots are used throughout the study to help provide a visual depiction and bring the case to life.
- Writing Your Report** A sample format of an expert witness report is provided as a roadmap to prepare the expert report. The report writing process is completed by using the information from the case study.
- Inside The Courtroom** At some point in the forensic examiner's career the examiner may be called upon to testify in court. This section provides some helpful insight as to what to expect during trial and the types of questions may be asked during cross examination.

The Appendix of this handbook provides additional sample reports as guides to offer examples for organizing and formatting forensic reports. Additionally it provides a case study to demonstrate timeline analysis which can help to connect other events and people behind the keyboard.

[A Practical Guide to Computer Forensics Investigations](#) Darren R. Hayes, 2015 A Practical Guide to Computer Forensics Investigations introduces the newest technologies along with detailed information on how the evidence contained on these devices should be analyzed.
