

Performance Task

Production Schemes

1. Factory in Wichita, Kansas

- a. Write one or two sentences to describe the cost function for the Wichita factory.

The cost of producing 25,000 units is \$1. From 25,001 units to 35,000 units the cost lowers to \$0.80.

- b. Write the piecewise function for the cost per unit for production of units in the Wichita factory. That is, state the function $C(x)$, where x is the number of units produced.

$$f(x) = \begin{cases} \$1, & \text{for } 1 \leq x < 25,000 \\ \$0.80, & \text{for } 25,000 < x \leq 35,000 \end{cases}$$

- c. What is the cost per unit for 35,000 units?

$$\text{Cost per unit for 35000 units} = C(35000) = \frac{0.8}{35000} = 2.28(10^{-5})$$

- d. According to the graph, if only one unit was produced, the cost per unit would be \$1.00. In reality, the company would not call in its workers and start up the equipment to produce one unit. What safeguard do you think that many manufacturers use to avoid this type of problem?

The factory would study the expenses involved with setting the factory into production, wages for workers' salaries, and other factory running expenses into the total cost of producing the units (such would obviously drastically change the graph from the one presented), and make sure that there is a threshold at least on the "breaking even" with the estimated revenue coming from the units produced/ordered.

- e. Of the following three statements, choose the best option and write a viable argument showing how it is reflected by the Cost Function for Wichita's factory.

The plant's production processes are performed primarily by robots that are able to work longer hours, when needed, at no additional cost.

Handbook of Scheduling Joseph Y-T. Leung, 2004-04-27 Researchers in management industrial engineering operations and computer science have intensely studied scheduling for more than 50 years resulting in an astounding body of knowledge in this field Handbook of Scheduling Algorithms Models and Performance Analysis the first handbook on scheduling provides full coverage of the most recent and advanced topics on the subject It assembles researchers from all relevant disciplines in order to facilitate cross fertilization and create new scheduling insights The book comprises six major parts each of which breaks down into smaller chapters Part I introduces materials and notation with tutorials on complexity theory and algorithms for the minimization of makespan total completion time dual objectives maximum lateness the number of late jobs and total tardiness Part II is devoted to classical scheduling problems Part III explores scheduling models that originate in computer science operations research and management science Part IV examines scheduling problems that arise in real time systems focusing on meeting hard deadline constraints while maximizing machine utilization Part V discusses stochastic scheduling and queueing networks highlighting jobs that are not deterministic Part VI covers applications discussing scheduling problems in airline process and transportation industries as well as in hospitals and educational institutions

The End of Project Overruns Robert M. Patty, Michael A. Denton, 2009-11 Applying the principles in this book unleashes ingenuity that achieves solidifies and perpetuates a new performance culture of mutual benefit In this culture project teams will prepare their work in task packages and enable workflow necessary to leave inefficiency of time and resource literally no place to hide Project examples will help teams implement the principles that shorten cycle times eliminate error improve quality and reduce costs to succeed in meeting project commitments Emerging Lean enterprise relationships between clients EPC contractors and their entire supply chain will advance what constitutes the new market differentiating performance of individuals project teams and companies justifying high levels of trust and inter organizational efforts to improve Client executives will learn to recognize root causes of risk and sources of excellence to mitigate them Well developed strategic improvement is often constrained because the traditional way current means and methods fit squarely in everyone's comfort zone By learning to ask the right questions top client leadership will soon render overruns from the best traditional systems as not good enough and strive for a new level of excellence EPC executives will better engage creative voices from their best resources and stakeholders to resolve all concerns and define a unified vision for how to deliver on clients expectations without overruns during capital project delivery Lean methods will effectively assure that vision principles and best expectations are understood and implemented at the workplace Department discipline and stakeholder leaders will align and no longer frustrate each other and their clients They will plan and execute with increased efficiency and effectiveness Cost reduction will accelerate retaining only client valued quality enabling a nimble response to market opportunities and threats Project and program managers will confidently accept intense market induced cost and

schedule reduction efforts They will apply new metrics measure potential and extract align and pilot improvements They will make workforce progress transparent to simplify resource balancing full utilization and workforce flow during all project phases The results will differentiate team members and their project s performance on the world stage Project professionals and the skilled labor force will gain confidence to make and keep increasingly difficult commitments and experience thereby increasing opportunity in an organization known for excellence They will fully engage heart and mind for leaders who expect excellence and they trust to enable and reward best practice performance while they jointly eliminate root causes of problems before they happen This book guides readers through each essential role for the transformation to Lean not just at the lowest levels but of the entire business model and all the supporting processes Resulting market recognition of sustained excellence of people their systems and they way they work together will create a market leading force *Pioneering Solutions in Supply Chain Performance Management* Thorsten Blecker,Wolfgang Kersten,Christian M. Ringle,2013-08-22 As competition between value chains on globalized markets is constantly getting fiercer there is a growing trend to achieve closer collaboration and integration within these value chains and increasingly more complex supply networks Additionally in the wake of the thrilling possibilities of using information technology and its potential in boosting the performance of supply chains researchers are increasingly looking for technology enabled solutions for a better supply chain performance management This volume edited by Thorsten Blecker Wolfgang Kersten and Christian Ringle provides valuable insights into Maritime Logistics Challenges and Opportunities Leveraging Logistics Processes for Supply Chain Performance Management Innovative Technology Solutions in Supply Chains Knowledge Management in Logistics This volume appeals to researchers and practitioners alike who are interested in current contributions by international authors providing theoretical empirical and case study oriented background and information on their research work *Learning in the Digital Era* Daryl John Powell,Erlend Alfnes,Marte D. Artificial Intelligence into ERP Software Siar Sarferaz,2024-05-30 This book explains how to embed artificial intelligence in digitized business processes of ERP software by solving the two related substantial challenges how can artificial intelligence be systematically integrated into ERP business processes for ease of consumption and how can artificial intelligence be made enterprise ready by covering ERP qualities like compliance lifecycle management extensibility or scalability As a general introduction the first part of this book takes the reader through a historical journey towards intelligent ERP systems In addition reference processes and a reference architecture for ERP systems are proposed which build the foundation for the

suggested subsequent solution concept including a method for operationalizing intelligence for ERP business processes Subsequently in the second part detailed concepts of embedding artificial intelligence into ERP software are proposed In this context the suggested solution architecture is depicted and specific topics are resolved like data integration model validation explainability data protection and privacy model degradation and performance In the last part an implementation framework is suggested which enables the previously introduced concepts and harmonizes the development and operations of artificial intelligent ERP applications This part concludes with case studies considering artificial intelligence scenarios of SAP S 4HANA in the areas of logistics finance and sales which apply the defined solution approach and shows its real world feasibility This book is written for professionals who want to implement as developers or exploit as business analysts or consultants or consider plan the implementation exploitation as managers of artificial intelligence in business information systems *A Methodological Study in the Development of a Training Aids Selection Form* U.S. Naval Training Device Center,1956 **NBS Special Publication** ,1969 *Making Valuable Measurements* Henry Lea Mason,1969

Handbook of Whale Optimization Algorithm Seyedali Mirjalili,2023-11-24 Handbook of Whale Optimization Algorithm Variants Hybrids Improvements and Applications provides the most in depth look at an emerging meta heuristic that has been widely used in both science and industry Whale Optimization Algorithm has been cited more than 5000 times in Google Scholar thus solving optimization problems using this algorithm requires addressing a number of challenges including multiple objectives constraints binary decision variables large scale search space dynamic objective function and noisy parameters to name a few This handbook provides readers with in depth analysis of this algorithm and existing methods in the literature to cope with such challenges The authors and editors also propose several improvements variants and hybrids of this algorithm Several applications are also covered to demonstrate the applicability of methods in this book Provides in depth analysis of equations mathematical models and mechanisms of the Whale Optimization Algorithm Proposes different variants of the Whale Optimization Algorithm to solve binary multiobjective noisy dynamic and combinatorial optimization problems Demonstrates how to design develop and test different hybrids of Whale Optimization Algorithm Introduces several application areas of the Whale Optimization Algorithm focusing on sustainability Includes source code from applications and algorithms that is available online *Human Factors, Business Management and Society* Vesa Salminen,2025-07-26 Proceedings of the 16th International Conference on Applied Human Factors and Ergonomics and the Affiliated Conferences Orlando Florida USA 26 30 July 2025 Clarity in Healthcare Quality Dr Mazen M Salama,2023-01-09 Section One Healthcare Quality The healthcare industry is constantly evolving and with it comes the need for quality professionals to ensure that patients receive the best possible care This section will introduce the concept of healthcare quality and the various aspects that contribute to it We will discuss the importance of value in healthcare and the shift towards a value based system We will also introduce the principles of total quality management and how they can be

applied in the healthcare setting to improve the quality of care
