Bakhshandeh, 2022-07-05 Coaching is a necessary skill for managers. It is important as a fundamental part of an organization's talent efforts including talent acquisition, development, and retention strategies. For a coaching program to succeed in an organization, it should be recognized as a useful approach throughout the organization and become part of the fabric of the corporate culture. Performance Coaching for Managers provides an important tool for organizations to use to train their managers on coaching. This book differs significantly from other books in the coaching market. Many books on coaching cast coaches as facilitators who question their clients, the coachees, helping them to articulate their own problems, formulate their own solutions, develop their own action plans to solve problems, and measure the success of efforts to implement those plans. That is called a nondirective approach. But this book adopts a directive approach by casting the coach as a manager who diagnoses the problems with worker job performance and offers specific advice on how to solve those problems. While there is nothing wrong with a nondirective approach, it does not always work well in job performance reviews in which the manager must inform the worker about gaps between what is needed, the desired, and what is performed, the actual.
