aspects of the nurse's role. It provides a complete picture of the care of adults with chronic and acute illness and covers the role of the nurse as manager and coordinator of care. It is written by practising nurses and is an invaluable companion.

**The Ophthalmic Study Guide** Dorothy Field, Marina Forbes, 2016-05-23 This classic introduction to ophthalmology has been thoroughly revised and updated to reflect the changes in practice that have taken place since it was first published in 2009. In recent years an increasing variety of health professionals have been involved with the care of ophthalmic patients. The aim has been to provide an efficient high quality and cost effective service to patients which utilises the skills of the multidisciplinary ophthalmic team. This study guide offers both a basic introduction and a skills escalator for nurses and other health professionals. Those who make use of its content and use the To do panels for reflection and research will develop their knowledge and skills more quickly and acquire good habits of self assessment and self directed learning. The simple questions at the end of each chapter can be used for self testing or as a basis for questions that mentors can ask their students. The content is deliberately restricted to the basics in terms of the areas chosen though they are all covered in reasonable depth. Students are encouraged to use the skills checklists at the end of the book to document their personal progress and validate their developing practice. These will provide useful evidence for annual performance appraisals.

**New Developments in Eye Research** O. R. Ioseliani, 2006 The consequences of ageing populations combined with the strain to the human eye caused by computers and widespread poor nutritional practices has resulted in an upsurge of research dealing with vision. The book presents leading edge research in this field. *The Glaucomas* Roberto Sampaolesi, Juan Roberto Sampaolesi, Jorge Zárate, 2013-11-29 This second volume in a short series on the glaucomas is devoted to the two main types of the disease open angle glaucoma and angle closure glaucoma. The contents are based on observations and experience gained during the management of more than 40 000 hospital and 7 000 private patients with follow up of 10 to 50 years. The book is comprehensive in scope. All aspects of diagnosis are carefully examined, surgical indications and techniques are explained and the role of medical treatment is evaluated. Importantly chapters are included on topics that are frequently overlooked in other books but are important to early diagnosis such as diurnal pressure curve, HRT and non conventional perimetry. This volume provides a wealth of information and includes almost 1000 illustrations, the majority in color as well as an accompanying DVD of surgical techniques. It will be an invaluable asset for all ophthalmologists.
