Darling-Hammond, 2014-07-16 A forward thinking look at performance assessment in the 21st century Next Generation Assessment Moving Beyond the Bubble Test to Support 21st Century Learning provides needed answers to the nation's growing concerns about educational testing in America Drawing on research and the experiences of leading states and countries this new book examines how performance assessments can offer a feasible alternative to current high stakes tests As parents educators and policymakers have increasingly criticized the effects of the teaching to the test mandate from the No Child Left Behind Act the need for this resource has never been more critical This summary volume to Beyond the Bubble Test speaks to the nationwide unease about current tests focus on low level skills like recalling and restating facts rather than higher order skills such as problem solving analyzing and synthesizing information It illustrates how schools can use authentic assessments to improve teaching and learning as they involve students in conducting research designing investigations developing products and solutions using technology and communicating their ideas in many forms This important book Serves as a must have resource for those interested in the most current research about how to create valid and reliable performance assessments Explains how educators can improve practice by developing using and scoring performance assessments Helps policymakers and educators accurately assess the benefits and possibilities of adopting performance assessments nationally If you're an educator researcher graduate student district administrator or education policy specialist Next Generation Assessment is an indispensable resource you'll turn to again and again

Cognition, Metacognition, and Reading Donna-Lynn Forrest-Pressley, T. Gary Waller, 2013-03-12 We had our first conversation about cognition metacognition and reading in September of 1976 Our particular concern was with reading and learning to read and what if anything meta cognition might have to do with it all We didn't really know much about metacognition then of course but then most other people were in the same predicament Some people had been working with interesting approaches and results on metalanguage and reading among them J Downing L Ehri L Gleitman 1 Mattingly and E Ryan and it also was about that time that people were becoming aware of E Markman's first studies of comprehension monitoring Other than that perhaps the most influential item around was the perhaps already classic monograph by Kruetzer Leonard and Flavell on what children know about their own memory Also in the air at that time were things like A Brown's notions about knowing knowing about knowing and knowing how to know D Meichenbaum's ideas about cognitive behavior modification and the

work by A Brown and S Smiley on the awareness of important units in text Even though these developments were cited as new and innovative it was not the case that psychologists had never before been of questions They certainly interested in or concerned with metacognitive sorts had as clearly evidenced by the notion of metaplans in Miller Galanter and Pribram s Plans and the Structure of Behavior

Principles and Practices of Performance Assessment Nidhi Khattri,Alison L. Reeve,Michael B. Kane,2012-12-06 This volume explores the recent national trend toward adoption of performance assessments Embraced at all levels of educational decision making state district school and teacher the shapes these assessments take and the affects they have at the classroom level can differ significantly from one setting to another Based on case studies of 16 schools this study describes what performance assessments actually look like the types of tasks they pose to children the scoring methods used the purposes to which they are put and how they fit in with other components of assessment systems It also shows how they differ when they are introduced by state departments of education districts and schools themselves Factors that affect policymakers and educators abilities to successfully design and introduce performance assessments are also explored These include the purposeful coordination of performance assessment with related education reforms such as the adoption of content and student performance standards and the professional development for teachers necessary to the successful implementation of performance assessments Barriers to adoption most notably the challenges of developing a technically sound performance assessment are discussed as well Crucial to teachers ability to appropriate performance assessments for use in their own classrooms is their invovlement in designing and implementing them Although it would be impossible for a state or school district to involve all teachers in the design of a performance assessment they can take steps to foster teachers understanding of the purposes and methods of the assessment thereby supporting their ability to use similar methods in their daily teaching Toward that end this book describes the experiences of teachers and students with a range of assessments that all fall under the umbrella of

performance assessment In addition it provides rich illustrations of those experiences across a diverse group of schools descriptions of the trade offs inherent in developing a student assessment system demonstrations of why no single assessment can be all things to all people and valuable insights for teachers administrators policymakers and researchers who want to improve their understanding of how performance assessments work in practice and how they may best serve to improve teaching and learning
