**Development** Hari Harindranath, W. Gregory Wojtkowski, Joze Zupancic, Duska Rosenberg, Wita Wojtkowski, Stanislaw Wrycza, John A.A. Sillince, 2012-12-06 This book is a result of the Tenth International Conference on Information Systems Development ISD2001 held at Royal Holloway University of London United Kingdom during September 5-7 2001 ISD 2001 carries on the fine tradition established by the first Polish Scandinavian Seminar on Current Trends in Information Systems Development Methodologies held in Gdansk Poland in 1988 Through the years this seminar evolved into an International Conference on Information Systems Development The Conference gives participants an opportunity to express ideas on the current state of the art in information systems development and to discuss and exchange views on new methods tools applications as well as theory In all 55 papers were presented at ISD2001 organised into twelve tracks covering the following themes Systems Analysis and Development Modelling Methodology Database Systems Collaborative Systems Theory Knowledge Management Project Management IS Education Management issues E Commerce and Technical Issues We would like to thank all the contributing authors for making this book possible and for their participation in ISD2001 We are grateful to our panel of paper reviewers for their help and support We would also like to express our sincere thanks to Ceri Bowyer and Steve Brown for their unfailing support with organising ISD2001

**Portals and Libraries** Sarah C. Michalak, 2012-12-06 Cutting edge information about providing access to research library users The ultimate goal of

librarians is to provide comprehensive informational access to library users. *Portals and Libraries* provides an in depth look at various libraries challenges and the cutting edge technology used in providing high quality electronic access to users through portal systems. Respected authorities detail efforts to build a new kind of search and retrieval system that includes access to the Web as well as other vital collections and academic resources. The book discusses the implementation of access systems and their supporting technology and spotlights strategies designed to encourage quality system user feedback, increase the cooperation and diligence of staff and more. *Portals and Libraries* comprehensively reviews library portals from their roots to their current state with a look at assorted products, their implementation issues and each one's advantages and shortcomings. The overall state of the portal system today as well as where it is heading in the future is examined in detail. The book also provides the ARL Scholars Portal Working Group Final Report from May 2002 summarizing the group's work from its inception and includes their recommendations of key portal features and needed functions. The text includes helpful screenshots, useful descriptive figures and extensive references. *Portals and Libraries* discusses the history of library portals, the MyLibrary NCState Web portal after five years of use, Portals to the World, Library of Congress guide to Web resources, the role integrated library systems will play in the future of portals, features and services to be added to library portals for greater success, portal technologies, their structures and functioning, planning portal implementation, online catalogs, usability testing and interface design, nine key issues that will impact the future of portal development. *Portals and Libraries* is crucial reading for library educators and students, college and research librarians in reference, library system professionals and technical services professionals focused on applying cutting edge technology to library services.

*Encyclopedia of Cryptography and Security* Henk C.A. van Tilborg, Sushil Jajodia, 2014-07-08. Expanded into two volumes, the Second Edition of Springer's *Encyclopedia of Cryptography and Security* brings the latest and most comprehensive coverage of the topic. Definitive information on cryptography and information security from highly regarded researchers. Effective tool for professionals in many fields and researchers of all levels. Extensive resource with more than 700 contributions. In Second Edition, 5643 references, more than twice the number of references that appear in the First Edition. With over 300 new entries appearing in an A-Z format, the *Encyclopedia of Cryptography and Security* provides easy, intuitive access to information on all aspects of cryptography and security. As a critical enhancement to the First Edition's base of 464 entries, the information in the *Encyclopedia* is relevant for researchers and professionals alike. Topics for this comprehensive reference were elected, written and peer reviewed by a pool of distinguished researchers in the field. The Second Edition's editorial board now includes 34 scholars, which was expanded from 18 members in the First Edition. Representing the work of researchers from over 30 countries, the *Encyclopedia* is broad in scope, covering everything from authentication and identification to quantum cryptography and web security. The text's practical style is instructional yet fosters investigation. Each area presents concepts, designs and specific implementations. The highly structured essays in this work include synonyms, a definition and discussion.

*Spatio-temporal Networks* Betsy George,Sangho Kim,2012-09-05 Spatio temporal networks STN are spatial networks whose topology and or attributes change with time These are encountered in many critical areas of everyday life such as transportation networks electric power distribution grids and social networks of mobile users STN modeling and computations raise significant challenges The model must meet the conflicting requirements of simplicity and adequate support for efficient algorithms Another challenge is to address the change in the semantics of common graph operations such as shortest path computation assuming different semantics or when temporal dimension is added Also paradigms e g dynamic programming used in algorithm design may be ineffective since their assumptions e g stationary ranking of candidates may be violated by the dynamic nature of STNs In recent years STNs have attracted attention in research New representations have been proposed along with algorithms to perform key STN operations while accounting for their time dependence Designing a STN database would require the development of data models query languages and indexing methods to efficiently represent query store and manage time variant properties of the network The purpose of Spatio temporal Networks Modeling and Algorithms is to explore this design at the conceptual logical and physical level Models used to represent STNs are explored and analyzed STN operations with an emphasis on their altered semantics with the addition of temporal dimension are also addressed
